|----------|--|-------------------------|---|--|
| <u> </u> | | | | |
| | Network Charge: Is a charge payable per premise every month. The purpose of the network charge is to recover part of the fixed network costs (including capital, operations, maintenance and | | | |
| l | refurbishment) associated with the provision of network capacity required and reserved by the | | | |
| | customer. For some tariffs the network charge is unbundled into a Network Demand Charge (NDC) | | | |
| | and/or a Network Access Charge (NAC). Network Demand Charge: Is a charge that recovers network costs on a variable basis and is payable | | | |
| | for the chargeable demand registered during the month. | | | |
| | Network Access Charge: Is a charge that recovers network costs on a fixed basis and is based on the | | *************************************** | |
| | annual utilised capacity. Notified Maximum Demand (NMD): Is the maximum demand notified in writing by the customer | | | |
| | and accepted by the Municipality, that the customer requires the Municipality to be in a position to | | | |
| | supply on demand during all time periods. It is normally the capacity that the Municipality will | | | |
| | reserve for a customer for the short term, i.e. the following year. One calendar-month's notice must be given in writing by the consumer to the Council of any increase or decrease in the notified maximum | | | |
| | demand and of the date upon which the revised supply is made available, the notified maximum | | | |
| | demand shall be increased or decreased accordingly. Note: The notification of demand is governed | | | |
| | by a set of rules called the NMD rules. | | | |
| ., | Point of Supply: Means a physical point on the electrical network where electricity is supplied to the | | | |
| | customer or where the customer's network connects to that of the Municipality (also see premise). | | | |
| | Power Factor: Is the ratio of kW to kVA measured over the same integrating period. Note: | | | |
| | Contractually a customer may not have a leading power factor or a power factor below 0,85. | | | |
| | | | | |
| | Premise or Point of Delivery: Means either a single Point of Supply or a specific group of Points of Supply located within a single substation, at which electricity is supplied to the customer at the same | | | |
| | declared voltage and tariff, and can be a metering or summation point | | | |
| | Rate Components: Are the different charges associated with a tariff that recover different costs, for example energy charge. | | | |
| | Rate-rebalancing Levy: Is a separate rate component, shown on Scale 5. Time-of-Use tariff for | | »· | |
| | customers' bills and indicating inter-tariff subsidies (subsidies between tariffs) in a more transparent | | | |
| | manner. The rate-balancing levy is applied to the total active energy consumption and is not subject to the voltage and/or transmission surcharge. | | | |
| | Reactive Energy Charge: Is a charge applicable if applied, to Time-of-Use tariff and is based on the | | | |
| i | reactive power used. It is levied on every kyar/h (reactive energy) which is registered in excess of | | | |
| | 30% of the kWh (active energy) supplied during the specified periods of the month. There is no | | | |
| į | reactive energy charge for a customer operating with a lagging power factor of 0,96 or better. The method of calculating this excess differs and is described with the respective tariff. | | | |
| | | | | |
| | Single-phase Supply: A 50 Hz a.c. supply at 230 V r.m.s. phase-to-neutral. The neutral carries the full load current. | | | |
| | Fariff: Is a combination of monthly charges each at particular rates that are usually escalated | | | |
| 1 | annually and are applied to recover measured quantities such as consumption and capacity costs and | | | |
| | unmeasured quantities such as service costs. Three-phase Supply: A 50 Hz a.c. supply at 230 V r.m.s. phase to neutral; 400 V r.m.s. phase-to- | | VI | |
| | phase (120' vector phase displacement). | | | |
| | Time-of-Use (TOU) Tariff: Is a tariff that has different energy rates for different time periods and | | | |
| ĺ | seasons in order to more accurately reflect the shape of the Municipality's long run marginal energy | | | |
| | Voltage Surcharge: Is a percentage surcharge levied to customers with lower supply voltages as a | | | |
| | contribution to the cost to transform electricity from 11 kV to lower voltages. It is calculated as a | | | |
| | percentage of the active energy charge, the energy demand charge (where applicable) and the network charge to reflect the higher cost at lower voltage. | | | |
| 2 | Conditions applicable to all tariff scales | | | |
| (a) | A consumer may apply to the Council to be billed on either the standard or the Time-of-Use tariff. A | | · | |
| l l | consumer may not apply to change over from the standard to the Time-of-Use tariff or from the Time- of-Use to the standard tariff more than once in a period of 12 months | | | |
| (b) | A consumer may apply to the Council to reduce or to increase the size of a circuit breaker (MCB) or | | | |
| 1 | he notified maximum demand. A consumer may not apply to reduce a circuit breaker or to reduce the | | | |
| (c) | ortified maximum demand more than once in a period of 12 months Definitions not covered by the Council's Bylaws will be the same as those recorded in the Eskom | | | |
| | ariff of Charges. | | | |
| (d) | All infra structure up to the point of supply remains the property of the Newcastle Municipality and | | | |
| | hall be handed over in accordance with the Electricity Department's standards. Maintenance of these ssets and replacement will therefore be for the Newcastle Municipality's account. | | | |
| | ascis and replacement will dieletore be for the Newcastle Municipality's account. | | | |
