1. Preamble

In terms of Section 62 (1) of the Municipal Finance Management Act (MFMA) the Accounting Officer of a Municipality is responsible for managing the financial administration of the municipality and, in terms of S62 (1) (f), must for this purpose take all reasonable steps to ensure – “that the municipality has and implements a tariff policy referred to in Section 74 of the Municipal Systems Act” (MSA).

In giving effect to S74 (1) of the Municipal Systems Act, the municipality adopts the following as the framework tariff policy within which the municipal council must adopt various policies.

2. Definitions

In this policy:

“**municipal area**” means the area in respect of which the municipality has executive and legislative authority as determined by the constitution and the National legislation and the area as demarcated by the Demarcation Act (Act 27 1998);

“**municipal council**” means a municipal council referred to in section 157 of the Constitution.

“**indigent households**” means those households in the municipal area whose monthly household income is no more than an amount as determined by Council annually and are included in the indigent register.

“**the Act**” means the Municipal Systems Act 2000, (Act 32 of 2000) (MSA).

3. Introduction

One of the primary functions of a local authority is to provide services to the people within its municipal area. The funding of these services is made possible by levying property taxes, charging for municipal services rendered and levy collection through business levies. Tariffs represent the charges levied by Council on consumers for the utilization of services provided by the Municipality. These are calculated dependent on the nature of service being provided.

They may be set in a manner so as to recover the full cost of the service being provided or recover part of the costs or bring about a surplus that can be utilized to subsidise other non-economical services.

4. Tariff principles

- 4.1 Users of municipal services must be treated equitably. The various categories of customers must pay the same charges based on the same cost structure¹.
- 4.2 The amount payable must be in proportion to usage².
- 4.3 Indigent households must have access to basic services through lifeline tariffs or direct subsidisation in accordance with the Integrated Development Plan³.
- 4.4 Tariffs must reflect the total cost of the service⁴.
- 4.5 Tariffs must be set at a level that facilitates the sustainability of the service.⁵ Sustainability can only be achieved when:
 - (i) Cash inflows cover cash outflows. This means that sufficient provision for working capital and bad debts must be made.
 - (ii) Access to the capital market is maintained. This can be achieved by providing for the repayment of capital, maintaining sufficient liquidity levels and making profits on trading services.
- 4.6 Provision must be made in appropriate circumstances for a surcharge on a tariff. This will be necessary for major breakdowns in infrastructure and periods of droughts when a restriction of usage is required⁶.
- 4.7 Efficient and effective use of resources must be encouraged. Penalties to promote the economic use of services as well as the conservation of water may be introduced.
- 4.8 The extent of subsidisation of tariffs should be fully disclosed.
- 4.9 On closure of the municipal account, a charge for the final reading shall be levied thereon.
- 4.10 The tariff structure of Newcastle may make provision for the differentiation between different categories of customers, debtors, service providers, services and geographical areas as long as the differentiation does not amount to unfair discrimination⁷. Where there is a substantial difference between the standard of services provided within a specified category, the Council can determine differentiated tariffs within the specified category.

5. Expenditure classification and cost elements

The Chief Financial Officer shall, subject to the guidelines of the Executive Committee of the Council, make provision for the following classification of services:

5.1 *Trading services*

These are services that the Council has classified as trading services and the tariffs have been compiled with the intention that the Council makes a profit on the delivery of the services. The consumption of the services is measurable and can be accurately apportioned to an individual consumer.

5.2 *Economic services*

These are services that the Council has classified as such and the tariffs have been compiled with the intention that the total costs of the services are recovered from customers. No surplus or deficit should be incurred.

5.3 *Community services*

These are services that the Council has classified as such and the tariffs have been compiled with the intention that the cost of the services cannot be recovered from public service charges. The service may be of a regulatory nature and the Council is usually unable to accurately determine the individual consumption.

5.4 *Subsidised services*

These are municipal services which are provided at an applicable rate which is less than the cost of actually providing the service, including services provided to customers at no cost. The cost of providing the service is usually such that it would not necessarily be affordable to the community.

5.5 *Cost elements*

The following cost elements will be used to calculate the tariffs of the different services:

- (i) *Fixed costs* are costs which do not vary with consumption or volume produced and which consist of the capital costs (interest and redemption) on external loans and or depreciation; whichever are applicable on the service and any other costs of a permanent nature as determined by the Council from time to time.
- (ii) *Variable cost*: These are costs that vary with consumption or volume produced and include all variable costs that have reference to the service.
- (iii) *Total cost* is equal to the fixed cost plus variable cost.
- (iv) *Flat rate*: This cost is calculated by dividing the total costs by volume used.

6. Tariffs

6.1 The tariffs are reviewed annually during the preparation of the budget and the proposed tariffs are presented to the community during the Council's budget consultative process prior to the approval of the final budget by the Council.

6.2 In setting service charges the Council shall:

- (i) accurately reflect costs to achieve economic efficiency;
- (ii) ensure equity and fairness between different types of consumers;
- (iii) utilise appropriate metering and supporting technology;
- (iv) be transparent; and
- (v) extend assistance to the poor by giving preference to single tariffs where possible.

6.3 In determining the type of tariff applicable to the type of service the Council may make use of the following four options or a combination of the same:

- (i) *Single tariff*: This tariff shall consist of a fixed cost per unit consumed. All costs will therefore be recovered through a unit charge at the level of breakeven consumption.
- (ii) *Cost related two to four part tariff*: This tariff shall consist of two to four parts. They are raised to cover the fixed and variable costs separately. The fixed costs are recovered by grouping certain components together and may be recovered by a fixed charge while the variable costs may be recovered by a unit charge per unit consumed.
- (iii) *Inclining block tariff*: This tariff is based on consumption levels being categorised into blocks, the tariff being determined and increased as consumption levels increase.
- (iv) *Declining block tariff*: This tariff is the opposite of the inclining block tariff and decreases as consumption levels increase.

7. Unit of measurement

The following units of measurement will, where possible, be used to determine tariffs:

7.1 Water

- (i) Cost per kilolitres consumed
- (ii) Basic/availability charge - based on the fixed cost associated with the service
- (iii) When consumption is not measured a flat rate will be applicable.
- (iv) When consumption cannot be read for a particular meter reading period, an estimate amounting to a 12 month average shall be levied on the account.

7.2 Electricity

- (i) Basic/availability charge - based on the fixed cost associated with the service
- (ii) Cost per kWh consumed
- (iii) Cost per Kilovolt-ampere (kVA)

- (iv) Maximum demand – Network demand charge and network access charge
- (v) When consumption is not measured a flat rate will be applicable.
- (vi) When consumption cannot be read for a particular meter reading period, an estimate amounting to a 12 month average shall be levied on the account.

7.3 Refuse removal

- (i) Bag removal
- (ii) Container Service
- (iii) Rental of containers
- (iv) Individual services as required

7.4 Sewerage

- (i) Per kilolitre of water consumption
- (ii) Per kilolitre of water consumption plus costs for strength of disposal.
- (iii) Basic/availability charge - based on the fixed cost associated with the service.

8. By-laws

The principle contained in this policy will be reflected in the various service by-laws as adopted and adjusted by Council from time to time.

7 BUDGET PROCESS

7.1 Medium Term Expenditure Revenue Framework

The Medium Term Expenditure Revenue Framework (MTERF) details 3 year rolling expenditure and revenue plan for Newcastle Municipality. The MTERF budget process is designed to match the overall resource envelop, estimated through "top-down" macroeconomic and fiscal policy process with the bottom up estimation of the current and medium term cost of existing departmental plans and expenditure programmes

The budget process allows the Council to:-

- (a) Strengthen and evaluate the alignment between medium and long-term plans and funding proposals;
- (b) Revise its policy priorities, macroeconomic framework and revenue envelop;

BUDGET POLICY

- (c) Evaluate departmental plans and allocate available resources in line with the policy priorities;
- (d) Obtain the required authority from Council to spend (service delivery);
- (e) Align parameter settings with budget outcomes and resource allocations

7.2 Integrated Development Plan Formulation

The Integrated Development Plan (IDP) process is a process through which the municipality prepare strategic development plans for a five-year period. An IDP is one of the key instruments for local government to cope with its new developmental role and seeks to arrive at decisions on issues such as municipal budgets, land management, promotion of local economic development and institutional transformation in a consultative, systematic and strategic manner.

In order to ensure certain minimum quality standards of the IDP Review process and proper coordination between and within spheres of government, the municipality need to prepare an IDP review process plan and formulate a budget to implement the IDP. The IDP and Budget Process Plan has to include the following:

- (a) A programme specifying the timeframes for the different planning steps;
- (b) Appropriate mechanisms, processes and procedures for consultation and participation of local communities, organs of state, traditional authorities and other role players in the IDP review and budget formulation processes; and
- (c) Cost estimates for the review process.

The preparation of the IDP process plan is in essence the formulation of the IDP and Budget processes, set out in writing and requires the adoption by Council.

7.3 Legal planning context

The preparation of the IDP and Budget processes are regulated by the Municipal Systems Act, No 32 of 2000 and the Municipal Finance Management Act, No 56 of 2003. This is to ensure certain minimum quality standards of the integrated development planning and budget process and proper coordination between and within the spheres of government.

As the IDP is a legislative requirement it has a legal status and it supersedes all other plans that guide development at local level.

BUDGET POLICY

The Municipal Systems Act, No 32 of 2000 (as amended) and the Municipal Finance Management Act, No 56 of 2003 confer the responsibility on the Mayor to provide political guidance over the budget process and the priorities that must guide the preparation of the annual budgets. In terms of section 53 of the Municipal Finance Management Act the Mayor must also coordinate the annual revision of the integrated development plan in terms of section 34 of the Municipal Systems Act and the preparation of the annual budget, and determine how the integrated development plan is to be taken into account or revised for the purpose of the budget. The Municipal Systems Act further requires the following regarding the IDP process:

Chapter 5 and Section 25 (1) of the Municipal Systems Act (2000) indicate that the Council must, within a prescribed period after the start of its elected term, adopt a single, all inclusive and strategic plan for the development of the municipality which:-

- (a) Links integrates and coordinates plans and takes into account proposals for the development of the municipality;
- (b) Aligns the resources and capacity of the municipality with the implementation of the plan;
- (c) Complies with the provisions of this Chapter; and
- (d) Is compatible with national and provincial development plans and planning requirements binding on the municipality in terms of legislation.

7.4 Alignment between IDP, Budget and PMS

In terms of the Municipal Systems Act, municipalities are required to prepare an organisational performance management system that must be linked to the IDP. Tremendous progress has been made with the process of aligning the IDP, Budget and Performance Management System (PMS). Every endeavor is made to link and integrate these three processes to an even greater extent through the Process Plan. It should however, be noted that the PMS on its own requires an in-depth process comparable to that of the IDP. Such PMS is tightly linked and guided by the IDP and Budget processes. The PMS process will address the following issues:

- (a) Alignment of the PMS, Budget and IDP processes;
- (b) Implementation of an individual performance management system at managerial level.

BUDGET POLICY

The IDP, performance management systems (PMS) and budget are all components of one overall development planning and management system. The IDP sets out what the municipality aims to accomplish and how it will do this. The PMS enables the municipality to check to what extent it is achieving its aims. The budget provides the resources that the municipality will use to achieve its aims. As indicated earlier, every attempt has been made in this process plan to align the IDP and PMS formulation and/or review, and the budget preparation process.

- 7.5.1 The budget process starts early in the year with a review of the IDP and budget processes of the previous year.

FUNDING & RESERVES POLICY

1. PREAMBLE

The funding and reserves policy is aimed at ensuring that the municipality has sufficient and cost-effective funding in order to achieve its objectives through the implementation of its operating and capital budgets.

This policy aims to set guidelines towards ensuring financial viability over both the short- and long-term which includes reserves requirements.

2. POLICY OBJECTIVES

- 2.1 The objectives of the policy are to:
 - 2.1.1 Ensure that the Medium Term Expenditure Framework (annual budget) of the municipality is appropriately funded.
 - 2.1.2 Ensure that cash resources and reserves are maintained at the required levels to avoid future year unfunded liabilities.

3. SCOPE OF THE POLICY

FUNDING & RESERVES POLICY

5. FUNDING OF ANNUAL BUDGET

- 5.1 An annual budget may only be funded from:
- (a) cash backed accumulated funds from previous years surpluses and reserves not committed for any other purpose;
 - (b) borrowed funds but only for capital expenditure; and/or

- 5.2 Realistic anticipated revenue projections must take into account:
- (a) projected revenue for the current year based on collection levels to date.
 - (b) actual revenue collected in previous financial years.
- 5.3 Capital expenditure may only be incurred on a capital project only if:
- (a) the funding for the project has been appropriated in the capital budget.
 - (b) the total cost for the project has been approved by Council.
 - (c) the future budgetary implications and projected cost covering all financial year until the project is operational has been considered.
 - (d) the implications of the capital budget on municipal tax and tariff increases.
 - (e) the sources of funding are available and have not been committed for other purposes.

6. CASH MANAGEMENT

- 6.1 The availability of cash is one of the most important requirements for working capital management and must be closely monitored to ensure a minimum days cash on hand of forty five (45) days for its daily operations.
- 6.2 Changes in the municipal environment that may have an impact on the municipal cash flow position include:
- (a) changes in revenue levels as a result of consumption patterns (water restrictions, load shedding etc.);
 - (b) reduced growth as a result of economic conditions;
 - (c) increase in non-payment rate as a result of economic conditions;
 - (d) implementation of electricity industry pricing policy (inclining block tariffs).
 - (e) increased debt levels.

FUNDING & RESERVES POLICY

- 6.3 Surplus cash not immediately required for operational purposes is invested in terms of the municipality's investment policy to maximize the return on investment.

7. DEBT MANAGEMENT

- 7.1 Debt is managed in terms of the municipal credit control and debt collection policy and the writing off of bad debts and impairments of debtors policy.
- 7.2 The provision for revenue that will not be collected are budgeted as an expense and is based on the projected annual non-payment rate for each service.

8. OPERATING BUDGET

- 8.1 The operating budget provides funding to departments for their medium term expenditure as planned. The municipality categorises services rendered to the community according to its revenue generating capabilities.
- (a) trading services – services that generate surpluses that can be used for cross subsidization to fund other services.
 - (b) economic services – services that break even with no surpluses.
 - (c) rates and general services – services that are funded by rates, surpluses generated by trading services, and/or other revenues generated such as fines, interest received, grants and subsidies etc.
- 8.2 The operating budget is funded from the following main sources of revenue:
- (a) property rates.
 - (b) surpluses generated from service charges.
 - (c) government grants and subsidies.
 - (d) other revenue, fines, interest received etc.
 - (e) cash backed accumulated surpluses from previous years not committed for any other purposes.
- 8.3 The following guiding principles apply when compiling the operating budget:
- (a) the annual budget must be balanced.
 - (b) growth parameters must be realistic taking into account the current economic conditions.

FUNDING & RESERVES POLICY

- (c) tariff adjustments must be realistic, taking into consideration the general inflation, affordability, bulk increases and the demand according to the approved Integrated Development Plan (IDP).
- (d) Revenue from government grants and subsidies must be in line with allocations gazette in the Division of Revenue Act and provincial gazettes.
- (e) Revenue from public contributions, donations or any other grants may only be included in the budget if there are acceptable documentation that guarantees the funds such as:
 - (i) signed service level agreement;
 - (ii) contract or written confirmation; or
 - (iii) any other legally binding document.
- (f) Property rates are levied according to the Municipal Property Rates Act, and property rates policy based on land and improvement values. The budget is compiled using the latest approved valuation and supplementary roll, consistent with current and past trends. Property rates tariffs and rebates are determined annually as part of the tariff setting process.
- (g) Property rates rebates, exemptions and reductions are budgeted either as revenue foregone or a grant as per directive in MFMA Budget Circular 51 depending on the conditions thereof.
- (h) Projected revenue from service charges must be realistic based on current and past trends with expected growth considering the current economic conditions. The following factors must be considered for each service:
 - (i) Metered services comprise of electricity and water:
 - the consumption trends for the previous financial years;
 - envisaged water restrictions or load shedding when applicable; and
 - actual revenue collected in previous financial years.
 - (ii) Refuse removal services:
 - the actual number of erven receiving the service per category; and
 - actual revenue collected in previous financial years.
 - (iii) Sewerage services:
 - the actual number of erven receiving the service and the consumption trends per category; and
 - actual revenue collected in previous financial years.

FUNDING & RESERVES POLICY

- (i) Rebates, exemptions or reductions for service charges are budgeted either as revenue foregone or as a grant as per directive in MFMA Budget Circular 51 depending on the conditions thereof.
- (j) Other projected income is charged in terms of the approved sundry tariffs and fines considering the past trends and expected growth for each category.
- (k) Provision for revenue that will not be collected is made against the expenditure item bad debt and based on actual collection levels for the previous financial year and the projected annual non-payment rate.
- (l) Interest received from actual long-term and or short-term investments are based on the amount reasonably expected to be earned on cash amounts available during the year according to the expected interest rate trends. Transfers from the accumulated surplus to fund operating expenditure will only be allowed for specific once-off projects and with no recurring operating expenditure resulting thereof.
- (m) Transfers from the accumulated surplus to offset the increased depreciation charges as a result of the implementation of GRAP 17 will be phased out over a number of years.
- (n) A detailed salary budget is compiled on an annual basis. All funded positions are budgeted for in total and new and/or funded vacant positions are budgeted for six (6) months only of the total package considering the recruitment process. As a guiding principle the salary budget should not constitute more than 35% of annual operating expenditure.
- (o) Depreciation charges are fully budgeted for according to the asset register and to limit the impact of the implementation of GRAP 17 a transfer from the accumulated surplus is made. However the annual cash flow requirement for the repayment of borrowings must fully be taken into consideration with the setting of tariffs.
- (p) To ensure the health of municipal assets, sufficient provision must be made for the maintenance of existing and infrastructure assets based on affordable levels, resulting that maintenance budgets are normally lower than the recommended levels. Therefore the mere reduction of maintenance budgets to balance annual budgets must carefully be considered. As a guiding principle repair and maintenance should constitute between 5 and 8% of total operating expenditure and should annually be increased incrementally until the required targets are achieved.
- (q) Individual expenditure line items are to be revised each year when compiling the budget to ensure proper control over expenditure. Increases for these line

FUNDING & RESERVES POLICY

items must be linked to the average inflation rate and macro-economic indicators unless a signed agreement or contract stipulates otherwise.

9. CAPITAL BUDGET

- 9.1 The capital budget provides funding for the municipality's capital programme based on the needs and objectives as identified by the community through the Integrated Development Plan and provides for the eradication of infrastructural backlogs, renewal and upgrading of existing infrastructure, new developments and enlargement of bulk infrastructure.
- 9.2 Provisions on the capital budget will be limited to availability of sources of funding and affordability. The main sources of funding for capital expenditure are:
- (a) accumulated cash backed internal reserves;
 - (b) borrowings;
 - (c) government grants and subsidies; and
 - (d) public donations and contributions,
- 9.3 The following guiding principles applies when considering sources of funding for the capital budget:
- (a) Government grants and subsidies:
 - (i) only gazette allocations or transfers as reflected in the Division of Revenue act or allocations as per provincial gazettes may be used to fund projects;
 - (ii) the conditions of the specific grant must be taken into consideration when allocated to a specific project; and
 - (iii) government grants and subsidies allocated to specific capital projects are provided for on the relevant department's operating budget to the extent the conditions will be met during the financial year.
 - (b) In the case of public contributions, donations and/or other grants, such capital projects may only be included in the annual budget if the funding is guaranteed by means of:
 - (i) signed service level agreement;
 - (ii) contract or written confirmation; and/or
 - (iii) any other legally binding document.

FUNDING & RESERVES POLICY

- (c) Public donations, contributions and other grants are provided for on the relevant department's operating budget to the extent the conditions will be met during the financial year.
 - (d) The borrowing requirements as contained in the borrowing policy are used as a basis to determine the affordability of external loans over the Medium Term Income and Expenditure Framework. The ratios to be considered to take up additional borrowings:
 - (i) long-term credit rating of BBB;
 - (ii) interest cost to total expenditure to not exceed 8%;
 - (iii) long-term debt to revenue (excluding grants) not to exceed 50%;
 - (iv) payment rate of above 95%;
 - (v) percentages of capital charges to operating expenditure less than 18%.
 - (e) Allocations to capital projects from cash backed internal reserves will be based on the available funding for each ring-fenced reserve according to the conditions of each reserve as follows:
 - (i) infrastructure projects to service new developments and the revenue is received through the sale of erven must be allocated to the capital reserve for services ;
 - (ii) capital projects of a smaller nature such as office equipment, furniture, plant and equipment etc. must be allocated to the capital reserve from revenue which is funding from the revenue budget for that specific year. A general principle is that these types of capital expenditure should not exceed more than 1% of total operating expenditure;
 - (iii) capital projects to replace and/or upgrade existing assets will be allocated to the capital replacement reserve;
 - (iv) capital projects to upgrade bulk services will be allocated to the capital bulk contributions reserve for each service.
- 9.4 All capital projects have an effect on future operating budget therefore the following cost factors should be considered before approval:
- (a) additional personnel cost to staff new facilities once operational;
 - (b) additional contracted services, that is, security, cleaning etc.
 - (c) additional general expenditure, that is, services cost, stationery, telephones, material etc.
 - (d) additional other capital requirements to the operate facility, that is, vehicles, plant and equipment, furniture and office equipment etc.
 - (e) additional costs to maintain the assets;

FUNDING & RESERVES POLICY

- (f) additional interest and redemption in the case of borrowings;
- (g) additional depreciation charges;
- (h) additional revenue generation. The impact of expenditure items must be offset by additional revenue generated to determine the real impact on tariffs.

10. RESERVES

- 10.1 All reserves are "ring fenced" as internal reserves within the accumulated surplus, except for provisions as allowed by the General Recognized Accounting Practices (GRAP).
- 10.2 The following ring fenced reserves exist:
 - (a) *Capital reserve for new developments*

This reserve is used to fund capital expenditure to service new developments. Each development is ring fenced within this reserve. The valuer determines the price for the erven to be sold and the revenue generated through the sale of erven is then allocated to the specific development. This reserve must be cash backed to ensure the availability of cash to fund the capital expenditure required to service the erven.

- (b) *Capital replacement reserve*

Funding for capital budgets of future financial years are generated through a combination of methods. Once a municipality has reached its maximum gearing ability no further borrowings can be taken up. This necessitates that the municipality also invests in a capital replacement reserve, however, it must be cash backed.

This reserve once fully established will enable the municipality to provide internal funding for its capital replacement and renewal programme.

In the past the cash generated from depreciation was used for the redemption payments on borrowings only. The increased asset value as a result of GRAP 17 has resulted that the depreciation charges increased drastically which was not supported by cash.

FUNDING & RESERVES POLICY

To limit the tariff increases a non-cash contribution was made from the depreciation reserve to offset the depreciation charge.

Depreciation is a method to generate future cash. Therefore it is anticipated to annually incrementally decrease the offset depreciation charge from the depreciation reserve with 2% until the depreciation is fully funded from cash through tariff setting.

Other contributions to the capital replacement reserve through the operating budget are:

- (i) interest received on investments;
- (ii) surface rentals from mines as identified from time to time; and

This reserve must be cash backed to ensure the availability of cash to fund the municipal capital programme.

(c) Bulk capital contribution reserves

This reserve is to supplement capital expenditure for the necessary expansions and upgrading of bulk infrastructure due to new developments. Revenue generated through bulk services contributions are allocated to this reserve for each applicable service. This reserve must also be cash backed.

11. PROVISIONS

A provision is recognised when the municipality has a present obligation as a result of a past event and it is probable, more likely than not, that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are revised annually and those estimates to be settled within the next twelve (12) months are treated as current liabilities.

The municipality has the following provisions:

(a) Leave provision

FUNDING & RESERVES POLICY

Liabilities for annual leave are recognised as they accrue to employees. An annual provision is made from the operating budget to the leave provision. Due to the fact that not all leave balances are redeemed for cash, only 75% of the leave provision is cash backed.

(b) Landfill rehabilitation provision

The landfill site rehabilitation provision is created for the current operational site at the future estimated time of closure. The value of the provision is based on the expected future cost to rehabilitate the landfill site. This provision must be cash backed to ensure availability of cash for rehabilitation on closure.

(c) Long services awards

Municipal employees are awarded leave days according to years in service at year end. Due to the fact that not all long service leave balances are redeemed for cash, only 75% of the long service leave provision is cash backed.

(d) Post employment medical care benefits

The municipality provides post retirement medical care benefits by subsidizing the medical aid contributions to retired employees and their legitimate spouses. The entitlement to post retirement medical benefits is based on employees remaining in service up to retirement age and the completion of a minimum service period. The expected cost of these benefits is accrued over a period of employment. This provision must be cash backed to ensure the availability of cash for the payment of medical aid payments.

12. OTHER ITEMS TO BE CASH BACKED

(a) Donations, public contributions, unspent grant funding

Revenue received from conditional grants, donations and funding is recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. Unspent amounts in relation to donations, public contributions and unspent grant funding are therefore retained in

FUNDING & RESERVES POLICY

cash and are not available to fund any other items on the operating or capital budget other than that for which it was intended for.

(b) Consumer deposits

Consumer deposits are partial security for a future payment of an account. Deposits are considered a liability as the deposit is utilised on the account once the service is terminated. Therefore the funds are owed to consumers and can therefore not be utilised to fund the operating or capital budget.

Consumer deposits should be retained in cash. Due to the fact that it is not likely to redeem all of the consumer deposits at once, only 75% are cash backed.

13. IMPLEMENTATION AND REVIEW OF THIS POLICY

- 13.1 The Accounting Officer shall be responsible for the implementation and administration of this policy with the assistance of the Strategic Executive Director for Financial Services Department once approved by Council.
- 13.2 In terms of section 17(1) (e) of the Municipal Finance Management Act, 2003 this policy shall be reviewed on annual basis to ensure that it complies with changes in applicable legislation, regulations and any other directive issued by National Treasury, and tabled to Council for approval as part of the budget process.
- 13.3 This policy must be read in-conjunction with the Budget and Borrowing Policies; Local Government Municipal Finance Management Act, Act 56 of 2003; and Local Government Municipal Budget and Reporting Regulation, Regulation 393, published under Government Gazette 32141, 17 April 2009.

There is a limitation to the extent on investment on the institution selected. Not more than 30% of the Municipality's investments may be made with any one investment entity at a given time. This excludes investments matched to identify projects, working capital or held in the One Day Call Account. Any investments made shall be placed with registered banks.

9.2 Risk and Return

The offer of best interest rates on an investment must be considered with the degree of risk involved to both the financial institution and the investment instrument concerned. No investment shall be made with an institution where the degree of risk is perceived to be higher than the average risk associated with investment institutions. Money's invested may not be made for speculation and no funds may be borrowed at any time to be used for investments.

10. INVESTMENT PROCEDURE

d) Quotations must be obtained via e-mail communication, as rates generally change on a regular basis and time is a determining factor when investments are made.

e) No attempts must be made to make institutions compete with each other.

10.3. Long-term investment

a) Written quotations must be obtained for investments made for periods longer than twelve months.

b) The prior approval of the Accounting Officer must be obtained for all investments made for periods longer than twelve months after considering the cash requirement for the next three years.

After determining whether there is cash available for investment and fixing the maximum term of investment, the Chief Financial Officer or his/her Delegate must consider the way in which the investment is to be made. As rates can vary according to money market perceptions with regard to the terms of investment, quotations must be requested via email, within term limitations, and these must be set out on a schedule.

13.2 Commission Certificate

The Auditor General requires the financial institution, where the investment is made, to issue a certificate for each investment made. This certificate must state that no commission has, nor will, be paid to any agent or third party, or to any person nominated by the agent or third party.

13.3 Reports

The Council must be given a monthly report on all investments.

13.4 Cash in the Bank

Where money is kept in current accounts, it would be possible to bargain for more beneficial rates with regards to deposits, for instance call deposits. Fixed term

CASH MANAGEMENT & INVESTMENT POLICY

deposits can increase these rates. The most important factor is that the cash in the current account must be kept to an absolute minimum.

13.5 Obtaining Quotations

a) Quotations for call deposits greater than 7 days, fixed deposits or any other investment with a financial institution should be requested via e-mail for a period within the limitations of the anticipated term of the investment.

b) Quotations must be solicited from a minimum of three registered financial institutions referred to, bearing in mind the limits of the term for which it is intended to invest the funds.

c) All quotations must be recorded on a schedule by the accountant. This schedule, together with the printed e-mails, must thereafter be given to the Chief Financial Officer for review and final consideration.

d) The person responsible for requesting quotations from institutions should record the name of institution, the name of the person who gave the quotation and the relevant terms and rates and other facts such as whether the interest is payable on a monthly basis or on a maturity date. Written confirmation of the quotation accepted is essential.

e) Where an investment is made at an institution at a rate lower than that of other quotations, reasons must be recorded by the Accounting Officer/delegated official and reported to Council as part of the SCM quarterly report by the Accounting Officer or his/her delegated official.

14 INTERNAL CONTROL PROCEDURES

14.1 An investment register must be kept of all investments made. The following facts must be indicated:

- b) Capital invested;
- c) Date invested;
- d) Interest rate; and
- e) Maturity date and

CASH MANAGEMENT & INVESTMENT POLICY

- f) Interests earned on investments,
- g) The Reason for investment (Purpose).

- 14.2 The investment register and accounting records must be reconciled on a monthly basis. The investment register must be examined on a fortnightly basis by the senior official under the direction of the Chief Financial Officer as instructed, to identify investments falling due within at least two weeks.
- 14.3 Where investments are to be undertaken for a period longer than three (3) months, a cash flow analysis is required.
- 14.4 Interest, correctly calculated, must be received timeously, together with any distributable capital. The Chief Financial Officer or his or her assignee must check that the interest is calculated correctly, in terms of sound universally accepted financial management practices.
- 14.5 All investment must be denominated in South African Rand (ZAR)

BORROWING POLICY

1. PREAMBLE

- 1.1 Considering the large demand for municipal infrastructure, borrowing is an important element to obtain additional funding sources to fund the municipal capital programme over the medium term.
- 1.2 Given that a large portion of municipal infrastructure has a long-term economic life and a general principle is that the current ratepayers should not pay for the usage of future ratepayers, there is a strong economic argument to finance this capital expenditure through long-term borrowing in order to accelerate the pace of delivery and to mirror the repayment of funds with the economic life of the asset.

2. DEFINITIONS

"Act" means the Local Government: Municipal Finance Management Act, 2003 (Act No. 56 of 2003).

"current year" means the financial year which has already commenced but not yet ended;

"debt" means-

- (a) monetary liability or obligation created by a financing agreement, note, debenture, bond or overdraft, or by the issuance of municipal debt instruments; or
- (b) a contingent liability such as that created by guaranteeing a monetary liability or obligation of another;

"disclosure statements" means a statement issued or to be issued by:

- a municipality which intends to incur debt by issuing municipal debt instruments; and
- a person who intends to incur debt by issuing securities backed by municipal debt.

"financing agreement" means any loan agreement, lease, instalment, purchase arrangement under which a municipality undertakes to repay a long-term debt over a period of time.

"lender" in relation to a municipality means a person who provides debt finance to the municipality.

"long term debt" means debt repayable by the municipality over a period exceeding one (1) year.

"municipal debt" means:

- (c) a monetary liability or obligation on a municipality by:
- a financing agreement, note, debenture, bond or overdraft; and
 - the issuance of municipal debt instruments.

BORROWING POLICY

- (d) a contingent liability such as that created by guaranteeing a monetary liability or obligation of another.

"security" means any mechanism intended to secure the interest of a lender or investor and includes any of the mechanisms mentioned.

"short term debt" means debt that is repayable over a period not exceeding one (1) year.

3. POLICY OBJECTIVES

The objectives of the policy are to:

- 3.1 enable the municipality to exercise its obligation to ensure sufficient cash resources to implement capital programme in the most cost effective manner;
- 3.2 ensure compliance with the relevant legal and statutory requirements relating to municipal borrowing;
- 3.3 govern the taking up of short-term and long-term debt according to the legislative framework;
- 3.4 manage interest rate and credit risk exposure;
- 3.5 maintain debt with specified limits and ensure adequate provision for the repayment of debt; and
- 3.6 maintain financial sustainability.

4. SCOPE OF THE POLICY

- 4.1 This policy shall apply to the Council, Executive Committee, all Portfolio Committees, Accounting Officer and Strategic Executive Directors. It is, however, specifically applicable to the council and all officials who have a formal, administrative duty to deal with capital projects and programmes of the municipality management of budget.

5. APPLICABLE LEGISLATION

- 5.1 In terms of the Municipal Finance Management Act, No. 56 of 2003, Chapter 6 on Debt, Section 45 (1) which deals with short-term debts states that a municipality may incur short-term debt only in accordance with and subject to the provisions of the act and only when necessary to bridge shortfalls and capital needs within a specific financial year.

BORROWING POLICY

- 5.2 In terms of the Municipal Finance Management Act, No. 56 of 2003, Chapter 6 on Debt, Section 46 (1) which deals with long-term debts states that a municipality may incur short-term debt only in accordance with and subject any applicable provisions of the act, including Section 19 for the purposes of capital expenditure or re-financing existing long-term debt.
- 5.3 Local Government Municipal Regulations and Debt Disclosure, Regulation R492, published under Government Gazette 29966, 15 June 2007 further regulates compulsory disclosures when incurring municipal debt and securities backed by municipal debt.

6. BORROWING PRINCIPLES

- 6.1 The economic life of assets should always be equal to or longer than the tenure of the debt finance.

There are five main reasons why access to financial markets is considered important for local authorities. These may be summarised as follows:

- *Access to capital.* Local governments in SA are responsible for infrastructure that requires large, "lumpy" capital investments on a periodic basis. Given the extensive needs in SA, financing this investment on a "pay-as-you-go" or "taxation-in-advance" basis is usually neither possible nor efficient. Particularly where the need for capital greatly exceeds what is available on a grant basis from the central fiscus, access to capital markets can provide municipalities with the capital resources necessary to finance infrastructure investments efficiently.
- *Inter-temporal equity.* The benefits of the infrastructure investments that municipalities make often endure for extensive periods and accrue to future generations of taxpayers and consumers. It is equitable for such generations to bear some of the costs of these benefits. Financing investment over time with funds accessed from capital markets allows for this.
- *Efficiency.* Because capital markets allocate capital resources on a commercial basis, capital should be appropriated efficiently. Moreover, the opportunity costs of capital provide incentives to ensure efficient standards of delivery and discouraged "overbuilding" and wasteful investment.

BORROWING POLICY

- *Accountability.* Markets tend to punish poor fiscal and management performance through pricing (pushing up interest rates or making capital increasingly scarce.) This can promote accountability and fiscal discipline at the local level. It may also provide other stakeholders (national government; the provinces; aid agencies and so on) with a convenient means to assess the relative performance of municipal governments.
- *Short-term matching of revenues and expenditures.* In the short term – for example within a given financial year – municipal revenues and expenditures are seldom completely congruent in time. Short-term borrowing allows municipalities to deal with this lack of synchronicity.
- International experience suggests that achieving these benefits depends on the method of access and the conditions under which this access occurs. In principle there are two main routes here: local governments can access capital markets through “on-lending” from central government, most often through a *Policy Framework for Municipal Borrowing and Financial Emergencies* 9 public intermediary (a financial parastatal), or they may access the markets directly.

In SA the DBSA, which is increasingly active in the municipal market, already represents one “indirect” access mechanism. As already recorded, the interface between this mechanism and the private market in respect of municipal debt is an important issue which will require further attention once the policy framework outlined below is established in legislation. The DBSA aside, there are three broad reasons that government wishes to facilitate direct access by municipalities to the capital markets:

- *Limitation of implicit or contingent liabilities.* It is important to protect central government from ultimately inheriting the debts of local government. When sub-sovereigns borrow through central government the debts of these bodies easily become the implicit or contingent liabilities of central government. Policy and legislation need to ensure that central government is not perceived as banker of last resort. This is necessary for prudent fiscal management at the national level and is fundamental to government’s ability to maintain its macro targets. It is also needed to ensure that municipalities face strong incentives to improve their own management and creditworthiness, knowing that it is unlikely that central support will be forthcoming to compensate for local mismanagement or policy errors.

BORROWING POLICY

- *Systemic discipline.* International experience suggests that the indirect borrowing route can result in situations where credit allocation decisions become increasingly less commercial in character. Under such conditions, capital does not necessarily flow to the most productive uses, but to those players which are politically the most astute. In other words the efficiency and accountability outcomes mentioned above become diluted. Incentives for inefficient and wasteful decision-making can replace those which encourage the productive use of capital and tight financial management.
- *Expanding investment resources.* Subsovereign borrowing via the state can result in the “squeezing out” of private capital from the municipal sector, thereby narrowing the aggregate resource available for investment. Moreover, central control of borrowing can also create incentives for local governments to elude these restrictions through innovative off-budget schemes. Centralised borrowing, therefore, does not necessarily increase the ability of central government to control the liabilities of local government, but it may simultaneously diminish the overall financial resource base for investment in worthy projects.

In sum, direct access to capital markets offers the potential for a more transparent, market-based system to develop where there is a greater chance of achieving the benefits of accessing capital markets discussed above. However, it is also true that moral hazard problems – which arise from the assumption by capital markets that borrowing by local governments is ultimately backed by central government - may also develop where there is direct borrowing by sub sovereigns from private financial markets. Ultimately, such problems can never be eliminated completely. The basic objective of the detailed policy framework given below is to ensure that such risks are managed through an appropriate regulatory framework while allowing market discipline to guide the allocation of capital in order to maximise the potential benefits that this offers.

7. COMPULSORY DISCLOSURES WHEN INCURRING MUNICIPAL DEBT

- 7.1 When entering into discussions with a prospective lender with a view to incur municipal debt, the municipality must indicate in writing to the prospective lender whether it intends to incur short-term or long-term debt.
- 7.2 In the case of short-term debt it must be disclosed whether the debt is to bridge:

BORROWING POLICY

- (a) shortfalls within a financial year during which the debt is incurred, in expectation or specific and realistic anticipated revenue to be received with that financial year; or
- (b) capital needs within a financial year, to be repaid from specific funds to be received from enforceable allocation or long-term debt commitments.

7.3 In the case of long-term debt, whether the purposes of the debt is for:

- (a) capital expenditure on property, plant or equipment to be used for the purpose of achieving the objectives of local government, subject to section 46(4) of the Act.
- (b) refinancing of existing long-term debt, subject to section 46(5) of the Act.

8. BORROWING PROCESS

The process as required by the Act is as follows:

8.1 Short-term debt

8.1.1 Newcastle Municipality may incur short-term debt only if:

- (a) a resolution of the municipal council, signed by the mayor, has approved the debt agreement; and
- (b) the accounting officer has signed the agreement or other document which creates or acknowledges the debt.

8.1.2 A short term debt transaction may be:

- (c) Approve by the municipality alone; or
- (d) approve an agreement with a lender for short-term credit facility to be accessed as and when required, including a line of credit or bank overdraft facility, provided that:
 - (i) the credit limit must be specified in the resolution of the council;
 - (ii) in terms of the agreement, including the credit limit, may be changed only by a resolution of the council; and
 - (iii) if the council approves a credit facility that is limited to emergency use, the accounting officer must notify the council in writing as soon as practical of the amount, duration and cost of any debt incurred in terms of such a credit facility, as well as options for repaying such debt.

BORROWING POLICY

8.1.3 Newcastle Municipality:

- (a) must pay off short-term debt within the financial year; and
- (b) may not renew or refinance short-term debt, whether its own debt or that of any other entity, where such renewal or refinancing will have the effect of extending the short-term debt into a new financial year.

8.1.4 No lender may willfully extend credit to a municipality for the purpose of renewing or refinancing short-term debt that must be paid off in terms of subsection 6.3 (a).

8.1.5 If a lender willfully extends credit to a municipality in contravention of paragraph 6.4, the municipality is not bound to repay the loan or interest on the loan.

8.1.6 Subsection 6.1.5 does not apply if the lender:

- (a) relied in good faith on written representations of the municipality as to the purpose of the borrowing; and
- (b) did not know and had no reason to believe that the borrowing was for the purpose of renewing or refinancing short-term debt.

8.2 Long-term debt

8.2.1 Newcastle Municipality may incur long-term debt only if:

- (a) a resolution of the municipal council, signed by the mayor, has approved the debt agreement; and
- (b) the accounting officer has signed the agreement or other document which creates or acknowledges the debt.

8.2.2 Newcastle Municipality may incur long-term debt only if the accounting officer of the municipality:

- (a) has, in accordance with section 21A of the Municipal Systems Act:
 - (i) at least twenty one (21) days prior to the meeting the council at which approval for the debt is to be considered, made public an information statement setting out particulars of the proposed debt, including the amount of the proposed debt, the purposes for which the debt is to be incurred and particulars of any security to be provided; and
 - (i) invited the public, the National Treasury and the relevant provincial treasury to submit written comments or representations to the council in respect of the proposed debt; and

LOSS CONTROL POLICY

1. INTRODUCTION

Council will bear its own damages and accident risks and be responsible for all claims and losses of Council owned property where these arise from council activities by an official who is liable in law and who is or was employed by council.

Section 78(1)(b-e) of the Municipal Finance Management Act places the onus on each official within the Department to take responsibility for the effective, efficient, economical and transparent use of financial and other resources within that official's area of responsibility. In particular, the official must take effective and appropriate steps to prevent, within that official's area of responsibility, any unauthorised, irregular, fruitless and wasteful expenditure and any under-collection of revenue due.

For the effective management of losses, potential losses and loss control can be divided to the following main functions:

- a) Reporting all claims, losses, and damage
- b) Ensuring the correct format and content of reports with regard to which claims, losses, and damage are registered
- c) Following up and investigating any claims, losses and damage
- d) Keeping a losses register in which particulars of all losses are recorded
- e) Recovery of money and checking of cases to be finalised

The identification of actions or instances of neglect, which may result in potential claims against or losses for Council, is very important for instituting preventative control measures. The accounting officer or his/her assignee must delegate the responsibilities attached to loss control as set out in the Municipal Finance Management Act in terms of section 79. This official can, where necessary, obtain the support of nominated officials on a decentralised basis.

Whereas section 14 of the Local Government: Municipal Finance Management Act, 2003 (Act no. 56 of 2003) determines that a municipal council may not dispose of assets required to provide minimum services, and whereas the Municipal Asset Transfer Regulations (Government Gazette 31346 dated 22 August 2008) has been issued.

And whereas the municipal council of Newcastle Local Municipality wishes to adopt a policy to guide the municipal manager in the management of the municipality's assets.

And whereas the municipal manager as custodian of municipal funds and assets is responsible for the implementation of the asset management policy which regulate the acquisition, safeguarding and maintenance of all assets.

And whereas these assets must be protected over their useful life and may be used in the production or supply of goods and services or for administrative purposes.

And whereas the Municipal Manager must ensure an effective Asset Management Committee that will give guidance regarding the execution of the asset management policies and procedures is in operation.

Now therefore the municipal council of the Newcastle Local Municipality adopts the following asset management policy:

2. DEFINITIONS

Accounting Officer means the Municipal Manager appointed in terms of Section 82 of the Local Government: Municipal Structures Act, 1998 (Act no. 117 of 1998) and

being the head of administration and accounting officer in terms of section 55 of the Local Government: Municipal Systems Act 2000 (Act no. 32 of 2000).

Agricultural Produce is the harvested product of the municipality's biological assets.

Biological Assets are defined as living animals or plants.

Assets are items of Biological Assets, Intangible Assets, Investment Property or Property, Plant or Equipment defined in this Policy.

Carrying Amount is the amount at which an asset is recognised after deducting any accumulated depreciation (or amortisation) and accumulated impairment losses thereon.

Chief Financial Officer (CFO) means an officer of a municipality designated by the Municipal Manager to be administratively in charge of the budgetary and treasury functions.

Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition or construction, or, where applicable, the amount attributed to that asset when initially recognised in accordance with the specific requirements of other Standards of GRAP.

Critical Assets are assets identified as having a high risk profile in terms of occupational health and safety standards and the consequence of failure could result in service delivery needs not being met and human health and safety as well as the environment being negatively affected.

Depreciable Amount is the cost of an asset, or other amount substituted for cost in the financial statements, less its residual value.

Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair Value is the amount for which an asset could be exchanged or a liability settled between knowledgeable, willing parties in an arm's length transaction.

GAAP are standards of Generally Accepted Accounting Practice.

GRAP are standards of Generally Recognised Accounting Practice.

Heritage Assets are defined as culturally significant resources. Examples are works of art, historical buildings and statues.

Infrastructure Assets are defined as any asset that is part of a network of similar assets. Examples are roads, water reticulation schemes, sewerage purification and trunk mains, transport terminals and car parks.

Intangible Assets are defined as identifiable non-monetary assets without physical substance.

Investment Properties are defined as properties (land or buildings) that are acquired for economic and capital gains. Examples are office parks and undeveloped land acquired for the purpose of resale in future years.

Land and Buildings are defined as a class of PPE when the land and buildings are held for purposes such as administration and provision of services. Land and Buildings therefore exclude Investment properties and Land Inventories.

MFMA refers to the Local Government: Municipal Finance Management Act (Act no. 56 of 2003).

Other Assets are defined as assets utilised in normal operations. Examples are plant and equipment, motor vehicles and furniture and fittings.

Property, Plant and Equipment (PPE) are tangible assets that:-

- Are held by a municipality for use in the production or supply of goods or services, for rental to others, or for administrative purposes, and
- Are expected to be used during more than one period.

Recoverable Amount is the higher of a cash-generating asset's net selling price and its value in use.

Recoverable Service Amount is the higher of a non-cash generating asset's fair value less cost to sell and its value in use.

Residual Value of an asset is the estimated amount that an entity would currently obtain from disposal of the asset, after deducting the estimated costs of disposal, if the asset were already of the age and in the condition expected at the end of its useful life.

Useful Life is:-

- The period of time over which an asset is expected to be used by the municipality; or
- The number of production or similar units expected to be obtained from the asset by the municipality's accounting officer.

3. OBJECTIVE

The MFMA was introduced with the objective of improving accounting in the municipal sector in keeping with global trends. Good asset management is critical to any business environment whether in the private or public sector. In the past municipalities used a cash-based system to account for assets, whilst the trend has been to move to an accrual system.

With the cash system, assets were written off in the year of disposal or, in cases where infrastructure assets were financed from advances or loans, they were written off when the loans were fully redeemed. No costs were attached to subsequent periods in which these assets would be used.

With an accrual system the assets are incorporated into the books of accounts and systematically written off over their anticipated useful lives. This necessitates that a record is kept of the cost of the assets, the assets are verified and the condition assessed periodically, and the assets can be traced to their suppliers via invoices or other such related delivery documents. This ensures good financial discipline, and allows decision makers greater control over the management of assets. An Asset Management Policy should promote efficient and effective monitoring and control of assets.

According to the MFMA, the Accounting Officer in the Municipality should ensure:

- that the municipality has and maintains an effective and efficient and transparent system of financial and risk management and internal control;
- the effective, efficient and economical use of the resources of the municipality;
- the management (including safeguarding and maintenance) of the assets of the municipality;
- that the municipality has and maintains a management, accounting and information system that accounts for the assets and liabilities of the municipality;
- that the municipality's assets and liabilities are valued in accordance with standards of generally recognised accounting practice; and
- that the municipality has and maintains a system of internal control of assets and liabilities, including an asset and liabilities register, as may be prescribed.

The objective of this Asset Management Policy is to ensure that the municipality:

- has consistent application of asset management principles;
- implements accrual accounting;
- complies with the MFMA, Treasury Regulations, GRAP and other related legislation;
- safeguards and controls the assets of the municipality; and
- Optimises asset usage.

ASSET MANAGEMENT COMMITTEE

To facilitate and assist the Chief Financial Officer in his/her functions, the Municipal Manager, hereby, delegates the custody of and responsibility for assets to the various Strategic Executive Directors (SEDs) as defined in the organisational structure of the Newcastle Local Municipality. Strategic Executive Directors will identify officials on an appropriate level to assist them with the application of the policy and procedures proclaimed from time to time. The Asset Management Committee as established in terms of paragraph 1 must be informed in writing of the appointment of Asset Controllers.

The responsibilities for asset management as detailed hereunder include and remain until the asset is disposed of or transferred to another entity:

- Ensuring that, when acquiring assets, decisions on how to account for the transactions, e.g. whether they should be capitalised or expensed, are made in full compliance with the MFMA, accounting standards, National Treasury and other guidelines;
- Ensuring that the purchase of assets complies with all municipal policies and procedures, including the MTREF;
- Ensuring that the correct date on which an asset is put into service or commissioned is properly recorded in the Asset Register and that the appropriate financial data are recorded;
- Ensuring that all assets are duly processed, identified and recorded before being issued for use;
- Ensuring that all assets under the Asset Manager's control are appropriately safeguarded from inappropriate use or loss, including appropriate control over the physical access to these assets and regular asset verification to ensure losses have not occurred, and

ensuring that any known losses are immediately reported to the Chief Financial Officer and loss control officer;

- Ensuring that proper procedures for the movement of assets from one asset holder to another, for maintenance, or disposals outside the municipality are in place and enforced;
- Ensuring assets are utilised for the purpose for which they were acquired by the municipality.
- Ensuring that all assets having a high risk profile in terms of occupational health and safety standards and the consequence of failure could result in service delivery needs not being met and human health and safety as well as the environment being negatively affected.

4. POLICY FRAMEWORK

The main challenges associated with managing assets can be characterised as follows:

- Moveable assets – controlling acquisition, location, use, and disposal (over a relatively short term lifespan)
- Immovable assets – life-cycle management (over a relatively long-term lifespan).

The policy approach has been to firstly focus on the financial treatment of assets, which needs to be consistent across both the movable and immovable assets, and secondly to focus on the management of immovable assets as a fundamental departure point for service delivery. This arrangement is summarised in Figure 1.

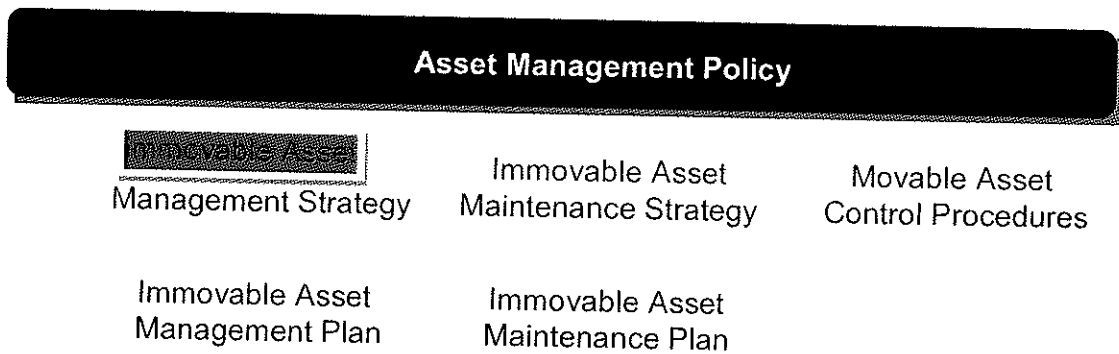

Figure 1: Proposed policy and strategic framework

5. Asset Recognition

5.1 Classification of Assets

General

When accounting for assets, the municipality should follow the various standards of GRAP relating to the assets. An item is recognised in the statement of financial position as an asset if it satisfies the definition and the criteria for recognition of assets. The first step in the recognition process is to establish whether the item meets the definition of an asset. Secondly, the nature of the asset should be determined, and thereafter the recognition criterion is applied. Assets are classified into the following categories for financial reporting purposes:

1. Property, Plant and Equipment (GRAP 17)
 - Land and Buildings (land and buildings not held as investment)
 - Community Assets (properties held to provide a social service and rental income is incidental)
 - Infrastructure Assets (immovable assets that are used to provide basic services)
 - Work in progress
 - Other Assets (ordinary operational resources)
2. Finance Lease Assets GRAP 13 (agreements that transfer the right to use assets even though substantial services by the lessor may be called for in connection with the operation/ maintenance of such assets)
3. Intangible Assets (GRAP 31)
 - Intangible Assets (assets without physical substance held for ordinary operational resources)
4. Investment Property (GRAP 16)
 - Investment Assets (resources held for capital or operational gain)
5. Heritage Assets (GRAP 103)
 - Heritage Assets
6. Agriculture (GRAP 27)
 - Biological Assets (livestock and plants held)

When accounting for Current Assets (that is of non-capital nature), the municipality should follow the various standards of GRAP relating to these assets.

Further asset classification has been defined in GRAP. The classifications used for infrastructure are limited and do not represent all asset types. However, these classifications are used for financial reporting consistency and should be used.

To facilitate the practical management of infrastructure assets and Asset Register data, infrastructure assets have been further classified. The recommended classifications for all assets are provided in **Appendix B**.

Policy

The asset classification specified by GRAP shall be adhered to as a minimum standard. The extended asset classification specified in **Appendix B** shall be adopted.

Procedures and Rules

- The Asset Management Committee shall ensure that the classifications specified by National Treasury, GRAP, and those adopted by the municipality are adhered to.
- The Asset Management Committee shall inform Strategic Executive Directors of the classification requirements.
- Strategic Executive Directors shall ensure that all fixed assets under their control are classified correctly.

5.2 <u>Identification of Assets</u>

General

An asset identification system is a means to uniquely identify each asset in the municipality in order to ensure that each asset can be accounted for on an individual basis. Movable assets are usually identified using a barcode system by attaching a barcode to each item. Immovable assets are usually identified by means of an accurate description of their physical location.

Policy

An asset identification system shall be operated and applied in conjunction with an Asset Register. As far as practicable, every individual asset shall have a unique identification number.

Procedures and Rules

- The Asset Management Committee shall develop and implement an asset identification system, while acting in consultation with Strategic Executive Directors.
- Strategic Executive Directors shall ensure that all the assets under their control are correctly identified.
- As far as practicable, all movable assets must be bar-coded or uniquely marked.
- Immovable assets must be identified using naming and numbering conventions that enable easy location of the assets in the field.
- GPS coordinates must be captured on the Asset Register for infrastructure assets and buildings where practicable. The Head: Information Technology will update the GIS and ensure that the GPS coordinates on the Asset Register and the GIS are reconciled at least once per year after the annual physical asset verification.

5.3 Asset Register

General

An Asset Register is a database of information related to all the assets under the control of the municipality. The Asset Register consists of an inventory of all the assets, with each asset having a unique identifying number. Data related to each asset should be able to be stored in the Asset Register. The data requirements for the Asset Register are as follows:

Data type	Land	Movable	Infrastructure/ Buildings

• Unique identification number or asset mark	✓	✓	✓
• Unique name	✓	✓	✓
• National Treasury Classification	✓	✓	✓

Assets remain in the Asset Register for as long as they are in physical existence or until being written off. The fact that an asset has been fully depreciated is not in itself a reason for writing-off such an asset.

Policy

An Asset Register shall be maintained for all assets. In some cases, such as Investment Properties, Heritage Assets and Intangible Assets, separate Asset Registers will have to be maintained. The format of the register shall include the data needed to comply with the applicable accounting standards and data needed for the technical management of the assets. The Asset Register should be continuously updated and asset records should be reconciled to the general ledger on an annual basis.

Procedures and Rules

- The CFO must define the format of the Asset Register in consultation with the Strategic Executive Directors and must ensure that the Asset Register format complies with legislative requirements.
- The Asset Management Committee must ensure that a defined process and forms exist to update and maintain the Asset Register.
- The Strategic Executive Directors must provide the CFO with the information required to compile and maintain the Asset Register.

6. RECOGNITION OF ASSETS: INITIAL MEASUREMENT

General

An asset should be recognised as an asset in the financial and asset records when:

- It is probable that future economic benefits or potential service delivery associated with the item will flow to the municipality;
- The cost or fair value of the item to the municipality can be measured reliably;
- The item is expected to be used for more than one financial year.

Spare parts and servicing equipment are usually carried as inventory in terms of the Standard of GRAP on *Inventories* and recognised in surplus or deficit as consumed. However, major spare parts and stand-by equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

Calculation of initial cost price

Only costs that comprise the purchase price and any directly attributable costs necessary for bringing the asset to its working condition should be capitalised. The purchase price exclusive of VAT should be capitalised, unless the municipality is not allowed to claim input VAT paid on purchase of such assets. In such an instance, the municipality should capitalise the cost of the asset together with VAT. Any trade discounts and rebates are deducted in arriving at the purchase price. Listed hereunder is a list, which list is not exhaustive, of directly attributable costs:

- Costs of employee benefits (as defined in the applicable standard on Employee Benefits) arising directly from the construction or acquisition of the item of the Asset
- The cost of site preparation;
- Initial delivery and handling costs;
- Installation costs;
- Professional fees e.g. architects and engineers etc.;
- The estimated cost of dismantling and removing the asset and restoring the site; and

When payment for an asset is deferred beyond normal credit terms, its cost is the cash price equivalent. The difference between this amount and the total payments is recognised as an interest expense over the period of credit.

Subsequent Expenses

Only expenses incurred on the enhancement of an asset (in the form of improved or increased services or benefits flowing from the use of such asset), or in the material extension of the useful operating life of an asset shall be capitalised.

Expenses incurred in the maintenance or reinstatement of an asset that ensures that the useful operating life of the asset is attained, shall be considered as operating expenses and shall not be capitalised, irrespective of the quantum of the expenses concerned.

Leased Assets – (GRAP 13)

A lease is an agreement whereby the lessor conveys to the lessee, in return for a payment or series of payments, the right to use an asset for an agreed period of time. Leases are categorised into finance and operating leases:

- A Finance Lease is a lease that transfers substantially all the risks and rewards incident to ownership of an asset, even though the title may or may not eventually be transferred. Where the risks and rewards of ownership of

an asset are substantially transferred, the lease is regarded as a finance lease and is recognised as an asset.

- Where there is no substantial transfer of risks and rewards of ownership, the lease is considered an Operating Lease and payments are expensed in the income statement on a systematic basis.

Policy

All assets shall be correctly recognised as assets and capitalised at the correct value. The assets will be updated accordingly in the Fixed Assets Register.

Procedures and Rules

- Strategic Executive Directors shall ensure that all leased assets under their control are correctly accounted for and recognised as assets.
- The CFO must keep a lease register with all the information that is necessary for reporting purposes, for example, opening balance, acquisitions, disposals, transfers, depreciation, accumulated depreciation, contracts, amortisation tables, etc.

7. SUBSEQUENT MEASUREMENT OF ASSETS

General

After initial recognition of Property, Plant and Equipment, the municipality values its assets using the cost model, unless a specific decision have been taken to revalue a certain class of assets and in such instance the PPE will be valued using the revaluation or value model.

When an item of PPE is revalued, the entire class of property to which that asset belongs, should be revalued.

When an asset's carrying amount is increased as a result of the revaluation, the increase should be credited to a revaluation surplus. However, the increase shall be recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same asset previously recognised in surplus or deficit.

When an asset's carrying amount is decreased as a result of devaluation, the decrease should be recognised as an expense in the annual financial statements. However, the decrease shall be debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

Procedures and Rules

- The CFO shall ensure that all Property, Plant and Equipment are correctly recorded in the Asset Register and revaluated (if applicable) in terms of the municipality's policies.

8. Asset Types

8.1 Property, Plant and Equipment: LAND AND BUILDINGS

General

Land and Buildings comprise any land and buildings held (by the owner or by the lessee under a finance lease) by the municipality to be used in the production or supply of goods or for administrative purposes and/or to provide services to the community. These assets include building assets such as offices, staff housing, aquariums, cemeteries, clinics, hospitals, game reserves, museums, parks and also include recreational assets such as tennis courts, swimming pools, golf courses, outdoor sports facilities, etc.

Land held for a currently undetermined future use, should not be included in PPE: Land and Buildings, but should be included in Investment Properties. For this class of Land and Buildings there is no intention of developing or selling the property in the normal course of business. This land and buildings include infrastructure reserves.

Policy

Land and buildings shall be accounted for using the cost model. Land shall initially be accounted for at cost price, or fair value in cases where cost price is not known, and shall not be depreciated. Land on which infrastructure and/or buildings are located shall be listed separately in the land register and not with the infrastructure or building assets. A reference to the land shall however be included in the infrastructure and/or building Asset Register.

Land and Buildings shall be recorded under the following categories;

- LAND
 - Developed Land
 - Undeveloped Land
- BUILDINGS
 - Dwellings
 - Non-residential Structures
- LANDFIL SITE

Procedures and Rules

- The CFO shall ensure that all land and buildings are correctly recorded in the Asset Register. The Asset Management Committee shall ensure that land and buildings are revalued (if applicable) in terms of the municipality's policies.
- The CFO shall ensure the recognition, measurement and revaluation of *Land and Buildings* in terms of GRAP 17.

General

Infrastructure Assets comprise assets used for the delivery of infrastructure-based services. These assets typically include electricity, sanitation, solid waste, storm water, transport, and water assets. Many infrastructure assets form part of a greater facility e.g. a transformer in a sub-station.

Level of detail of componentisation

For the technical management of infrastructure, the most effective level of management is at the maintenance item level. It is at this level that work orders can be executed and data collected. This data is useful for maintenance analysis to improve infrastructure management decision making. This level in most cases coincides with the level that means the accounting criteria of different effective lives and materiality. However, the collection of data at this level of detail can be very costly when dealing with assets that are very numerous in nature e.g. water meters, street signs, household connections, etc. It is therefore prudent to balance the value of the information with the cost of collecting the data i.e. Costs vs Benefits.

The compilation of a detailed infrastructure Asset Register in one financial term is a costly and onerous exercise. To ensure the practicality of implementing Asset Registers (and asset management planning as a whole), the International Infrastructure Management Manual (IIMM) recommends the adoption of a continuous improvement process as a practical implementation approach. This approach recognises the value of limited data above no data and enables the municipalities to slowly, but steadily, increase their knowledge in the assets they own. The improvement principles of the IIMM recommend starting with complete coverage of the infrastructure types at a low level of detail (e.g. level 2 or 3) and then improving the level of detail over a period of several years, starting with the high risk assets, such as pump stations, treatment works, etc.

Policy

The infrastructure Asset Register shall ensure complete representation of all infrastructure asset types. The level of detail of componentisation shall be defined to a level that balances the cost of collecting and maintaining the data with the benefits of minimising the risks of the municipality. An improvement plan stipulating the level of detail and the timing of improvements shall be prepared. Infrastructure assets should be valued at cost less accumulated depreciation and accumulated impairment. If cost can however not be established, then infrastructure assets will be valued at depreciated replacement cost. Depreciated replacement cost is an accepted fair value calculation for assets where there is no active and liquid market. Depreciation shall be charged against such assets over their expected useful lives. The remaining useful life and residual value of, and the depreciation methods applied to Infrastructure assets should be reviewed annually, but the cost related to such reviews should be measured against benefits derived to ensure value for money. Such reviews will have to be performed at least once in a three year cycle.

Infrastructure assets having a high risk profile in terms of occupational health and safety standards and the consequence of failure could result in service delivery needs not being met and human health and safety as well as the environment being negatively affected must be rated as critical in the Asset Register. Assets identified as critical in terms of the aforementioned are identified in **Annexure B**.

Infrastructure Assets shall be recorded under the following main categories;

- Electricity Network;
- Roads Network;
- Solid Waste Disposal;
- Storm Water Network

Procedures and Rules

- The Asset Management Committee shall define the level of detail of the infrastructure Asset Register in consultation with the Strategic Executive Directors.
- The Asset Management Committee shall approve an improvement process that defines the target level of detail for each infrastructure asset type with the target year of implementation in consultation with the Strategic Executive Directors.
- The Asset Management Committee shall ensure the recognition and measurement of *Infrastructure Assets* in terms of GRAP 17.
- Although a category of assets may not be regarded as critical as a whole, individual assets may fulfil in the definition of criticality and Strategic Executive Directors must inform the Asset Management Committee of such assets or any changes in the criticality of an asset/category of assets and the Asset Registers must be updated accordingly.

8.3 HERITAGE ASSETS – (GRAP 103)

General

A *Heritage Asset* is an asset that has historical, cultural or national importance and needs to be preserved. The following is a list of some typical heritage assets encountered in the municipal environment:

- Archaeological sites;
- Conservation areas;
- Historical buildings or other historical structures (such as war memorials);
- Historical sites (for example, historical battle site or site of a historical settlement);
- Museum exhibits;
- Public statues; and
- Works of art (which will include paintings and sculptures).

Policy

Heritage assets are valued at cost less accumulated impairment losses. No depreciation shall be charged against such assets. If the cost price of heritage assets is not known, then the heritage asset will be valued at fair value.

Procedures and Rules

- A register of all heritage assets will be kept by the municipality.
- For reporting purposes, the existence of such heritage assets shall be disclosed by means of an appropriate note in the Financial Statements.
- The Asset Management Committee, in consultation with Strategic Executive Directors, shall ensure that all heritage assets are appropriately recorded and valued in terms of the municipality's policies.

8.4 Property, Plant and Equipment: OTHER ASSETS

General

Other Assets include a variety of assets that are of indirect benefit to the communities they serve. These assets include office equipment, furniture and fittings, bins and containers, emergency equipment, motor vehicles, plant and equipment.

Policy

Other assets are stated at cost less accumulated depreciation and accumulated impairment losses. Depreciation shall be charged against such assets over their expected useful lives. Other assets are not revalued.

Other assets having a high risk profile in terms of occupational health and safety standards and the consequence of failure could result in service delivery needs not being met and human health and safety as well as the environment being negatively affected must be rated as critical in the Asset Register. Assets identified as critical in terms of the aforementioned are identified in **Annexure B**.

Other Assets shall be recorded under the following main categories;

- Aircraft;
- Bins and Containers;
- Emergency Equipment;
- Furniture and Fittings;
- Motor Vehicles;
- Office Equipment;
- Plant and Equipment;
- Specialised Vehicles;
- Watercraft; and
- Other Assets.

Procedures and Rules

- The Asset Management Committee, in consultation with Strategic Executive Directors, shall ensure that all other assets are appropriately recorded in terms of the municipality's policies.
- Although a category of assets may not be regarded as critical as a whole, individual assets may fulfil in the definition of criticality and Strategic Executive Directors must inform the Asset Management Committee of such assets or any changes in the criticality of an asset/category of assets and the Asset Registers must be updated accordingly.

8.5 Intangible Assets – GRAP 31

General

Intangible Assets can be purchased, or can be internally developed, by the municipality and includes, but are not limited to, computer software, website development cost, valuation roll, servitudes and mining rights.

Policy

Intangible assets are stated at cost less accumulated amortisation and accumulated impairment losses. Such assets are amortised over the best estimate of the useful life of the intangible asset. If an intangible asset is generated internally by the municipality, then a distinction should be made between research and development costs. Research costs should be expensed and development costs may be capitalised if all the criteria set out in GRAP 31 has been met.

Procedures and Rules

- The Asset Management Committee, in consultation with Strategic Executive Directors, shall ensure that all intangible assets are appropriately recorded in terms of the municipality's policies.
- It is the responsibility of the Head of Information Technology to ensure that all licensed computer software other than operating software are accounted.

8.6 Investment Property – GRAP 16

General

Investment Property comprise of land or buildings (or parts of buildings) or both, held by the municipality as owner, or as lessee under a finance lease, to earn rental revenues or for capital appreciation or both. Investment property does not include property used in the production or supply of service or for administration. It also does not include property that will be sold in the normal course of business. Typical investment properties include:

- Office parks (which have been developed by the municipality itself or jointly between the municipality and one or more other parties);
- Shopping centres (developed along similar lines);

- Housing developments (developments financed and managed by the municipality itself, with the sole purpose of selling or letting such houses for profit).
- Land held for a currently undetermined future use. For this class of Land and Buildings there is no intention of developing or selling the property in the normal course of business. This land and buildings include infrastructure reserves.

Policy

Investment Properties shall be accounted for in terms of GRAP 16 and shall not be classified as PPE for purposes of preparing the municipality's Statement of Financial Position. Investment Property shall initially be measured at its cost. Transaction costs shall be included in this initial measurement. Where an investment property is acquired at no cost, or for a nominal cost, its cost is its fair value as at the date of acquisition.

If the Council of the municipality resolves to construct or develop a property for future use as an investment property, such property shall in every respect be accounted for as PPE until it is ready for its intended use, where after it shall be reclassified as an investment asset.

After initial recognition, all investment property shall be measured at fair value. No depreciation will be calculated against the Investment Property. The fair value of investment property shall be determined annually at reporting date in terms of the municipality's Accounting Policy. The fair value should reflect market conditions and circumstances as at the reporting date.

Procedures and Rules

- The Asset Management Committee shall ensure that investment property assets are recorded in an Investment Property register.
- The Asset Management Committee shall ensure that an appropriately qualified valuator undertake such valuations on an annual basis.
- The Asset Management Committee shall ensure the recognition and measurement of *Investment Property* in terms of GRAP 16.

8.7	<u>Agricultural Assets – GRAP 27</u>
-----	--------------------------------------

General

Biological Assets are living plants and animals such as trees in a plantation or orchard, cultivated plants, sheep and cattle. Managed agricultural activity such as raising livestock, forestry, annual or perennial cropping, fish farming that are in the process of growing, degenerating, regenerating and / or procreating which are expected to eventually result in agricultural produce. Such agricultural produce is recognised at the point of harvest. Future economic benefits must flow to the municipality from its ownership or control of the asset.

Point-of-sale costs include commissions to brokers and dealers, levies by regulatory agencies and commodity exchanges, and transfer taxes and duties. Point-of-sale costs exclude transport and other costs necessary to get assets to the market.

Where the municipality is unable to measure the fair value of biological assets reliably, a biological asset should be measured at cost less any accumulated depreciation and accumulated impairment losses.

Policy

Biological assets, such as livestock and crops, shall be valued annually at fair value less estimated point-of-sales costs.

Procedures and Rules

- The Asset Management Committee, in consultation with Strategic Executive Directors, shall ensure that all biological assets obtained from a managed agricultural activity, such as livestock and crops, are valued at 30 June each year by a recognised valuator in the line of the biological assets concerned.
- The Asset Management Committee shall ensure the recognition and measurement of *Biological Assets* in terms of GRAP 27.

9. Asset Acquisition

9.1 Acquisition of Assets

General

Acquisition of assets refers to the purchase of assets by buying, building (construction), or leasing.

Policy

Should the municipality decide to acquire an asset, the following fundamental principles should be carefully considered prior to acquisition of such an asset:

- The purpose for which the asset is required is in line with the objectives of the municipality and will provide significant, direct and tangible benefit to it;
- The asset fits the definition of an asset (as defined in GRAP 12, GRAP 16, GRAP 17, GRAP 27, GRAP 31 and GRAP 103)
- The asset has been budgeted for;
- The future annual operations and maintenance needs have been calculated and have been budgeted for in the operations budget;
- The purchase is absolutely necessary as there is no alternative municipal asset that could be economically upgraded or adapted;
- The asset is appropriate to the task or requirement and is cost-effective over the life of the asset.
- The asset is compatible with existing equipment and will not result in unwarranted additional expenditure on other assets or resources;

- Space and other necessary facilities to accommodate the asset are in place.

Procedures and Rules

- The Asset Management Committee shall ensure that the Supply Chain Management Policy makes provision for these principles.
- The CFO shall ensure that all acquired assets are appropriately insured.

9.2	<u>Creation of New Infrastructure Assets</u>
-----	--

General

Creation of new infrastructure assets refers to the purchase and / or construction of totally new assets that have not been in the control or ownership of the municipality in the past.

Policy

The cost of all new infrastructure facilities (not additions to or maintenance of existing infrastructure assets) shall be allocated to the separate assets making up such a facility and values may be used as a basis for splitting up construction costs of new infrastructure into its significant components, each of which have an appropriate useful life.

Work in progress shall be flagged as such in the Asset Register until such time that the facility is completed. Depreciation will commence when the construction of the asset is finalised and the asset is in the condition necessary for it to operate in the manner intended by management.

Each part of an item of Infrastructure with a cost that is significant in relation to the total cost of the item shall be depreciated separately.

Procedures and Rules

- Strategic Executive Directors shall ensure that relevant documents are submitted to Finance that includes the details of the work in progress relating to the relevant invoice and/or payment request.
- Strategic Executive Directors shall notify Finance when the works have been completed and the assets can be recognised.
- Strategic Executive Directors shall guide the service provider to submit invoices of work in progress as per the components and classification of assets as in the Asset Register.
- Strategic Executive Directors shall keep a timesheet system for internal staff to capture professional time spent on infrastructure projects. The time shall be priced at recognised professional fee scales and should be included in the capitalisation cost of the asset.

9.3 Self-constructed Assets

General

Self-constructed assets relate to all assets constructed by the municipality itself or another party on instructions from the municipality.

Policy

All assets that can be classified as assets and that are constructed by the municipality should be recorded in the Asset Register and depreciated over its estimated useful life for that category of asset. Work in progress shall be flagged as such in the Asset Register until such time that the facility is completed. Depreciation will commence when the asset is in the condition necessary for it to operate in the manner intended by management.

Procedures and Rules

- Strategic Executive Directors shall ensure that proper records of staff time, transport and material costs are kept such that all costs associated with the construction of these assets are completely and accurately accounted for.
- Strategic Executive Directors shall open a job card for each infrastructure project constructed by the municipality.
- Strategic Executive Directors shall keep a timesheet system for internal staff to capture professional time spent on infrastructure projects. The time shall be priced at recognised professional fee scales and should be included in the capitalisation cost of the asset.
- On completion of the infrastructure project, the Strategic Executive Directors shall notify the Budget and Treasury Office of the asset being commissioned and will assist the Budget and Treasury Office in ensuring that all costs (both direct and indirect) associated with the construction of the assets are summed and capitalised to the assets that make up the project.

9.4 Donated Assets

General

A donated asset is an item that has been given to the municipality by a third party in government or outside government without paying or actual or implied exchange.

Policy

Donated assets should be valued at fair value, reflected in the Asset Register, and depreciated as normal assets.

Procedures and Rules

- All donated assets must be approved by the Asset Management Committee and ratified by Council prior to acceptance.

- The Asset Management Committee must evaluate the future operational costs of donated assets and the effect it might have on future tariffs and taxes, before a donated asset is accepted by the municipality.
- The conditions associated with the donation must be agreed upon and signed by the Municipal Manager.
- Municipal officers must inform the Asset Management Committee of any donations made to the Municipality.

10. Asset Maintenance

10.1 Useful Life of Assets

General

Useful Life of assets is defined in paragraph 2 of the Policy and is basically the period or number of production units for which an asset can be used economically by the municipality.

National Treasury (NT) published its Local Government Asset Management Guideline in August 2008 that includes directives for useful lives of assets, but municipalities must use their own judgement based on operational experience and in consultation with specialists where necessary in determining the useful lives for the particular classes of assets. Should the municipality decide on a useful life outside the given parameters, the National Treasury (OAG) should be approached and provided with a motivation, for its agreement of the rate utilised. The calculation of useful life is based on a particular level of planned maintenance.

Policy

The remaining useful life of assets shall be reviewed annually. Changes emanating from such reviews should be accounted for as a change in accounting estimates in terms of GRAP 3.

Procedures and Rules

- Strategic Executive Directors must determine the reasonable remaining useful lives of the assets under their control. Changes in remaining useful lives must be approved by the Asset Management Committee.
- During annual physical verification the condition of each asset must be reviewed to determine the validity of its remaining useful life as reflected on the Assets Register. All items identified as being impaired (with remaining useful life shorter than anticipated as per the Assets Register) must be reported to the Chief Financial Officer who will implement steps to ensure that the impairments are incorporated in the Assets Register and reported on as required by the relevant standards of GRAP.
- The CFO shall ensure that remaining useful lives, and changes thereof, are properly recorded and accounted for in the Asset Register, general ledger and Financial Statements.
- The Asset Management Committee shall ensure that the *Remaining Useful Life* of an asset shall be reviewed at each reporting date.

10.2 Residual Value of Assets

General

The *Residual Value* of an asset is the estimated amount that the municipality would currently obtain from disposal of the asset, after deducting the estimated costs of

disposal, if the asset were already of the age and in the condition expected at the end of its useful life.

Policy

Residual values should be determined upon the initial recognition (capture) of assets. However, this will only be applicable to assets that are normally disposed of by selling them once the municipality does not have a need for such assets anymore, e.g. motor vehicles. In practice, the residual value of an asset is often insignificant and therefore immaterial in the calculation of the depreciable amount.

The residual value of assets shall be reviewed annually at reporting date. Changes in depreciation charges emanating from such reviews should be accounted for as a change in accounting estimates in terms of GRAP 3.

Procedures and Rules

- Strategic Executive Directors must determine the reasonable residual values of the assets under their control. Changes in residual values must be approved by the Asset Management Committee.
- The CFO shall ensure that residual values, and changes thereof, are properly recorded and accounted for in the Asset Register and the general ledger.
- The Asset Management Committee shall ensure that the *residual value* of an asset shall be reviewed at each reporting date.

10.3 Depreciation of Assets

General

Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life. Depreciation therefore recognises the gradual exhaustion of the asset's service capacity. The depreciable amount is the cost of an asset, or other amount substituted for cost in the financial statements, less its residual value.

The depreciation method used must reflect the pattern in which economic benefits or service potential of an asset is consumed by the municipality. The following are the allowed alternative depreciation methods that can be applied by the municipality:

- Straight-line;
- Diminishing Balance; and
- Sum of the Units.

Policy

All assets, except land, investments properties and heritage assets, shall be depreciated over their reasonable useful lives. The *residual value* and the *useful life* of an asset shall be reviewed at each reporting date. The depreciation method applied must be reviewed at each reporting date. Reasonable budgetary provisions shall be made annually for the depreciation of all applicable assets controlled or used by the municipality, or expected to be so controlled or used during the ensuing financial year.

Depreciation shall take the form of an expense both calculated and debited on a monthly basis against the appropriate line item in the department or vote in which the asset is used or consumed. Depreciation of an asset should begin when the asset is ready to be used, i.e. the asset is in the location and condition necessary for it to be able to operate in the manner it is intended by management. Depreciation of an asset ceases when the asset is de-recognized. Therefore, depreciation does not cease when the asset becomes idle or is retired from active use and held for disposal unless the asset is fully depreciated. However, under certain methods of depreciation the depreciation charge can be zero while there is no production.

In the case of intangible assets being included as assets, the procedures to be followed in accounting and budgeting for the amortisation of intangible assets shall be identical to those applying to the depreciation of other assets.

Procedures and Rules

- Strategic Executive Directors must ensure that a budgetary provision is made for the depreciation of the assets under their control in the ensuing financial year.
- Strategic Executive Directors must determine the reasonable useful life of the asset classifications under their control. Deviations from the standards of useful life must be motivated in writing to the Asset Management Committee for approval.
- In the case of an asset which is not listed in the asset classification list, Strategic Executive Directors shall determine a useful operating life, in consultation with the CFO, and shall be guided in determining such useful life by the likely pattern in which the asset's economic benefits or service potential will be consumed. The Asset Management Committee must be informed of the additional asset classification and amend the Asset Management Policy accordingly.
- Alternative depreciation methods may be used in exceptional cases, if motivated by the Strategic Executive Director controlling the asset to the Asset Management Committee. The Strategic Executive Director must then provide the Asset Management Committee with sufficient statistical information to make estimates of depreciation expenses for each financial year.
- The CFO shall ensure that depreciation shall be up to date on a monthly basis and be reconciled between the Asset Register and the general ledger.
- The CFO shall ensure that the *residual value, useful life and depreciation method* of an asset shall be reviewed at each reporting date.

10.4 <u>Impairment Losses – GRAP 21</u>

General

Impairment is the loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation. For example:

- Significant decline in market value;
- Carrying amount of an asset far exceeds the recoverable amount or market value;
- There is evidence of obsolescence (or physical damage);
- The deterioration of economic performance of the asset concerned; and
- The loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (such as through inadequate maintenance).

The impairment amount is calculated as the difference between the *carrying value* and the *recoverable service value*. The recoverable service value is the higher of the asset's value in use or its net selling price. Where the recoverable service amount is less than the carrying amount, the carrying amount should be reduced to the recoverable service amount by way of an impairment loss. The impairment loss should be recognised as an expense when incurred unless the asset is carried at revalued amount.

If the asset is carried at a revalued amount (in the case of investment property, infrastructure and community assets) the impairment should be recorded as a decrease in the revaluation reserve. Where immovable property, plant and equipment surveys are conducted, the recoverable service value is determined using the depreciated replacement costs method by assessing the remaining useful life.

Policy

Assets shall be reviewed annually for impairment. Impairment of assets shall be recognised as an expense, unless if it reverses a previous revaluation in which case it should be charged to the *Revaluation Surplus*. The reversal of previous impairment losses recognised as an expense is recognised as an income.

Procedures and Rules

- The Asset Management Committee must ensure that annual impairment surveys are performed.
- The CFO shall ensure that impairment losses, or reversals thereof, are properly recorded and accounted for in the Asset Register and the general ledger.

10.5	<u>Maintenance of Assets and the Asset Register</u>
------	---

General

Maintenance refers to all actions necessary for retaining an asset as near as practicable to its original condition in order for it to achieve its expected useful life, but excluding rehabilitation or renewal. This includes all types of maintenance – corrective and preventative maintenance.

For linear infrastructure assets, such as pipes and roads, the following test is applied to differentiate between maintenance and renewal when partial sections of linear assets are renewed:

- If a future renewal of the entire pipe will include the renewal of the partial section that is now renewed, then the renewal of the partial section is treated as maintenance.
- If a future renewal of the entire pipe will retain the partial section that is now renewed, then the renewal of the partial section is treated as renewal and the pipe is split into two separate assets.

The splitting of linear infrastructure has a data management implication, but it is the easiest method that maintains the data integrity over time.

Maintenance analysis is an essential function of infrastructure management to ensure cost-effective and sustainable service delivery. In order to analyse maintenance data, maintenance actions undertaken against individual infrastructure assets should be recorded against such assets.

Policy

Maintenance actions performed on infrastructure assets shall be recorded against the individual assets that are individually identified in the Asset Register.

The risk and criticality of all assets must be assessed in conjunction with the annual physical asset verification process. All assets with a condition rating greater than 3 (three) must be reported to the Asset Management Committee who will give instructions with regard to the criticality grading of the assets on the Asset Register. Strategic Executive Directors must ensure that the assets identified as critical are attended to in order to prevent possible failure.

Procedures and Rules

- Strategic Executive Directors responsible for the control and utilisation of infrastructure assets shall monitor maintenance actions and budget for the operation and maintenance needs of each asset or class of assets under their control. Operating expenses must include all labour and material costs for the repair and maintenance of the assets. This includes both contracted services and services performed by employees.
- Strategic Executive Directors shall ensure that the operating expenses are expended against the operating budget and not the capital budget.
- Strategic Executive Directors shall report to the Council annually of the extent to which the approved maintenance plan has been complied with and the extent of deferred maintenance.
- Strategic Executive Directors shall report to the Council annually on the likely effects that maintenance budgetary constraints may have on the useful operating life of the infrastructure asset classes;
- Strategic Executive Directors shall ensure that maintenance plans make provision for the additional maintenance burden of future infrastructure to be acquired.

10.6 Renewal of Assets

General

Asset Renewal is restoration of the service potential of the asset. Asset renewal is required to sustain service provision from infrastructure beyond the initial or original life of the asset. If the service provided by the asset is still required at the end of its useful life, the asset must be renewed. However if the service is no longer required, the asset should not be renewed. Asset renewal projections are generally based on forecast renewal by replacement, refurbishment, rehabilitation or reconstruction of assets to maintain desired service levels.

Policy

Assets renewal shall be accounted for against the specific asset. The renewal value shall be capitalised against the asset and the expected life of the asset adjusted to reflect the new asset life.

Procedures and Rules

- The Asset Management Committee must ensure that processes are in place to capture renewals data against specific assets and to capitalise it correctly.
- Strategic Executive Directors shall ensure that renewals expenditure are correctly budgeted for in the capital budget and posted accordingly against this budget.
- Strategic Executive Directors must ensure that renewals expenditure data are correctly captured against the assets and the expected lives adjusted.

10.7 Replacement of Assets

General

This paragraph deals with the complete replacement of an asset that has reached the end of its useful life so as to provide a similar or agreed alternative level of service.

Policy

Assets that are replaced shall be written off at their carrying value. The replacement asset shall be accounted for as a separate new asset. All costs incurred to replace the asset shall be capitalised against the new asset.

Procedures and Rules

- The Asset Management Committee must ensure that processes are in place to capture replacement data against specific assets and to capitalise it correctly.

- Strategic Executive Directors shall ensure that replacement expenditure are correctly budgeted for in the capital budget and posted accordingly against this budget.

11. Asset Disposal

11.1 Transfer of Assets

General

The processes and rules for the transfer of an asset to another municipality, municipal entity or national/provincial organ of state are governed by an MFMA regulation namely "the Local Government: Municipal Asset Transfer Regulations".

Transfer of assets or inventory items refers to the internal transfer of assets within the municipality or from the municipality to another entity. Procedures need to be in place to ensure that the Asset Control Department can keep track of all assets and ensure that the fixed Asset Register is updated with all changes in asset locations. These procedures must be followed and apply to all transfers of assets from:

- One Department to another Department;
- One location to another within the same department;
- One building to another; and
- One entity to another.

Policy

The transfer of assets is regulated by the SCMP and shall be controlled by the transfer processes in the policy and the Asset Register shall be updated accordingly.

Procedures and Rules

- Strategic Executive Directors must ensure that all asset transfer information is passed to Budget and Treasury Office.
- The CFO must ensure that a process is in place to capture and record asset transfer data.
- Staff of the Municipality, except for duly authorised staff, shall not move rented assets, such as photocopy machines.
- No person shall transfer any IT equipment without the knowledge and written consent of the Head: Information Technology.
- Strategic Executive Directors must immediately report to the Asset Management Committee any damages caused to an asset and will be held responsible to investigate the cause or nature of such damage.

11.2 Exchange of Assets

General

According to GRAP 17.29 an item of PPE may be acquired in exchange for a non-monetary asset or assets, or a combination of monetary and non-monetary assets.

The cost of such an item of property, plant and equipment is measured at fair value unless:

- (a) the exchange transaction lacks commercial substance; or
- (b) the fair value of neither the asset received nor the asset given up is reliably measurable.

If the acquired item is not measured at fair value, its cost is measured at the carrying amount of the asset given up.

Policy

The SCMP will be applied when assets are exchanged. The cost of assets acquired in exchange for another asset shall be measured at the fair value of the asset received, which is equivalent to the fair value of the asset given up, adjusted by the amount of any cash or cash equivalents transferred.

Procedures and Rules

- An item of PPE may be acquired in exchange for a similar asset that has a similar use in the same line of operations and which has a similar fair value or may be sold in exchange for an equity interest in a similar asset. No gain or loss is recognised in both cases.
- The Asset Management Committee shall approve all asset exchanges in consultation with the relevant Strategic Executive Director.

11.3 Alienation / Disposal of Assets

General

Alienation / Disposal (alienation) is the process of disowning redundant and obsolete assets by transferring ownership or title to another owner, which is external to the municipality.

The MFMA (section 14 and 90) and the Municipal Supply Chain Management Regulation no. 27636 have specific requirements regarding the disposal of assets. Specifically:

- A municipality may not ...” permanently dispose of an asset needed to provide the minimum level of basic municipal services”
- Where a municipal council has decided that a specific asset is not needed to provide the minimum level of basic services, a transfer of ownership of an asset must be fair, equitable, transparent, competitive and consistent with the municipality’s supply chain management policy.

Policy

There are various methods of disposal. Different disposal methods will be needed for different types of assets. When deciding on a particular disposal method and consideration of the following, the SCMP on disposal of assets must be applied:

- The nature of the asset
- The potential market value

- Other intrinsic value of the asset
- Its location
- Its volume
- Its trade-in price
- Its ability to support wider Government programmes;
- Environmental considerations
- Market conditions
- The asset's life

Appropriate means of disposal may include:

- Public auction
- Public tender
- Transfer to another institution
- Sale to another institution
- Letting to another institution
- Trade-in
- Controlled dumping (for items that have low value or are unhygienic)

Alienated assets shall be written-off in the Asset Register.

Procedures and Rules

- Strategic Executive Directors shall report in writing to the Asset Management Committee timeously during the financial year on all assets which they wish to alienate and the proposed method of alienation.
- The CFO shall consolidate the requests received from the various departments, and shall promptly report the consolidated information to the Asset Management Committee, recommending the process of alienation to be adopted.
- The Council shall delegate to the Asset Management Committee the authority to approve the alienation of any asset.
- The Council shall ensure that the alienation of any asset takes place in compliance with Section 14 of the Municipal Finance Management Act, 2003. The Act states that the municipality may not alienate any asset required to provide a minimum level of service. The municipality may alienate any other asset, provided the municipality has considered the fair market value and the economic and community value to be received in exchange for the asset.
- Selling: Assets to be sold shall be sold in terms of paragraph 9.4 below.
- Donations: Donations may be considered as a method of alienation, but such requests must be motivated to the Asset Management Committee for approval.
- Destruction: Assets that are hazardous or need to be destroyed must be identified for tenders or quotations by professional disposal agencies.
- Scrapping: Scrapping of assets that cannot be alienated otherwise may be considered as a method of alienation, but such requests must be motivated to the Asset Management Committee.
- Once the assets are alienated, the CFO shall write-off the relevant assets in the Asset Register.

- The letting of immovable property must be done at market-related tariffs, unless the relevant treasury approves otherwise. No municipal property may be let free of charge without the prior approval of the relevant treasury.
- The Asset Management Committee must review, at least annually when finalising the budget, all fees, charges, rates, tariffs or scales of fees or other charges relating to the letting of municipal property to ensure sound financial planning and management.

11.4 Selling of Assets

General

Selling of assets refers to the public sale of municipal assets approved for alienation.

Policy

The selling of assets must be within the parameters laid down in the SCMP. Further must all assets earmarked for sale be sold by public auction or tender and the following steps shall be followed:

- A notice of the intention of the municipality to sell the asset shall be published in a local newspaper;
- In the case of a public auction, the municipality shall appoint an independent auctioneer to conduct the auction; and
- In the case of a tender, the prescribed tender procedures of the municipality shall be followed.

Sold assets shall be written-off in the Asset Register.

Procedures

- A request for assets to be sold must be submitted to the Asset Management Committee for approval. The request must be accompanied by a list of assets to be sold and the reasons for sale as described in paragraph 11.3 above.
- Assets earmarked for sale shall be reclassified as Assets Held-for-Sale.
- The Asset Management Committee may approve the engagement of auctioneers either on a quotation basis or by tender depending on the goods to be alienated.
- Bidding: Bidders are afforded the opportunity to make an offer on identifiable items. Bids are compared and the highest bidder is awarded the bid.
- Tenders: Tenders shall be invited according to the municipality's tender procedures.
- Once the assets are sold, the CFO shall write-off the relevant assets in the Asset Register.
- If the proceeds of the sales are less than the carrying value recorded in the Asset Register, such difference shall be recognised as a loss for the department or vote concerned in the Statement of Financial Performance. If the proceeds of the sales, on the other hand, are more than the carrying

value of the asset concerned, the difference shall be recognised as a gain for the department or vote concerned in the statement of financial performance.

- Transfer of assets to other municipalities, municipal entities (whether or not under the municipality's sole or partial control) or other organs of state shall take place in accordance with the above procedures, except that the process of alienation shall be by private treaty.

11.5 Writing-off of Assets

General

The write-off of assets is the process to permanently remove the assets from the Asset Register. Assets can be written-off after approval of the Asset Management Committee of a report indicating that:

- The useful life of the asset has expired;
- The asset has been destroyed;
- The asset is out dated;
- The asset has no further useful life;
- The asset does not exist anymore;
- The asset has been sold; and
- Acceptable reasons have been furnished leading to the circumstances set out above.
- The SCMP has been adhered to.

The CFO may approve the *ad hoc* writing-off of assets without prior approval of the Asset Management Committee on condition that –

- The write-offs fall after but between the next scheduled Asset Management Committee meeting and financial year end closure; and
- The Asset Management Committee is informed of the write-offs at the next scheduled Asset Management Committee meeting.

Policy

The only reasons for writing off assets, other than the sale of such assets during the process of alienation, shall be the loss, theft, destruction, material impairment, or decommissioning of the asset in question.

Procedures and Rules

- Strategic Executive Directors shall report to the CFO during the financial year on any assets which such Strategic Executive Director wishes to have written-off, stating in full the reason for such recommendation. The CFO shall consolidate all such reports, and shall promptly submit a recommendation to the Asset Management Committee on the assets to be written off.
- An asset, even though fully depreciated, shall be written-off only on the recommendation of the Strategic Executive Director controlling or using the

asset concerned, and with the approval of the Asset Management Committee.

- In every instance where a not fully depreciated asset is written off with no proceeds for the asset being obtained, the CFO shall immediately debit to such department or vote the full carrying value of the asset concerned as impairment expenses.
- Assets that are replaced should be written-off and removed from the Asset Register.

12. Asset Physical Control

12.1 Physical Control / Verification

General

Movable assets require physical control and verification of existence.

Policy

All movable assets shall be actively controlled, including an annual verification process.

Procedures and Rules

- All movable assets, where practicable, must have a visible bar code or unique asset marking as determined by the Asset Management Committee.
- Annual verification of movable assets should be conducted under the direction of Finance. This procedure would enable the municipality to identify discrepancies and dispositions and properly investigate and record the transactions.
- Procedures should be established to adequately identify assets owned by others or subject to reclamation by donors.
- The Asset Management Committee shall co-ordinate and control regular physical checks, and all discrepancies are to be reported immediately to the Asset Management Committee.
- Registers must be kept for those assets allocated to staff members. The individuals are responsible and accountable for the assets under their control. These registers should be updated when the assets are moved to different locations or allocated to a different staff member in order to facilitate control and physical verification.
- Where a change in person in direct control of equipment takes place, a handing-over certificate shall be completed and signed by both parties concerned and a copy of this certificate must be forwarded to Finance. If surpluses or deficiencies are found, the certificates shall be dealt with as with stock-taking reports.
- If for any reason the person from whom the asset is being taken over is not available, the asset controller should assist the person taking over with the checking of the equipment and the certification of any discrepancies.
- In case of failure to comply with the requirements of a handing-over certificate, the person taking over shall be liable for any shortages, unless it can be established that the shortages existed prior to their taking over.
- Any losses of and damage to equipment, excluding discrepancies at stocktaking of losses resulting from normal handling or reasonable wear and tear, shall be reported to the Asset Management Committee.
- Independent checks from asset records shall be conducted to ensure that the assets physically exist, especially those that could be disposed of without a noticeable effect on operations.

- Yearly physical inspections of assets shall be performed to identify items which are damaged, not in use or are obsolete due to changed circumstances, to ensure that they are appropriately repaired, written off or disposed of.
- All newly acquired assets shall be delivered to / received by the procurement section where the assets will be bar-coded before dispatch to the persons who will be the custodians of the assets. Where this is not practicable, the acquired assets must be delivered to the section issuing the requisition and that section must notify the finance section so that bar-coding or asset marking can be arranged.
- Delivery of assets by procurement staff must be to the person requiring the asset and he/she will sign a form accepting responsibility for the asset.
- The Asset Management Committee may, on request of a Strategic Executive Director, waive full physical verification and accept written confirmation from the Strategic Executive Director of infrastructure assets being verified during the course of a financial period as part of routine and/or planned maintenance and/or physical inspections. Documentation in this regard must be kept by departments and be available for inspection. The Chief Financial Officer will inform the external auditors of the Asset Management Committee's decision

12.2 Insurance of Assets

General

Insurance provides selected coverage for the accidental loss of the asset value. Generally, government infrastructure is not insured against disasters because relief is provided from the Disaster Fund through National Treasury.

Policy

Assets that are material in value and substance shall be insured at least against destruction, fire and theft. All municipal buildings shall be insured at least against fire and allied perils. Land shall not be included for the purpose of insurance.

Procedures and Rules

- The Departments will ensure that all assets are properly insured in terms of the policy.

12.3 Safekeeping of Assets

General

Asset safekeeping is the protection of assets from damage, theft, and safety risks.

Policy

Directives for the safekeeping of assets shall be developed and the safekeeping of assets shall be actively undertaken. The municipality shall establish and implement the Loss Control Policy for such purpose.

Procedures and Rules

- The Asset Management Committee must issue directives that detail the safekeeping of assets.
- Strategic Executive Directors must ensure that safekeeping directives are adhered to.
- Malicious damage, theft, and break-ins must be reported to the CFO and loss control officer within 48 hours of its occurrence or awareness. The CFO will inform the Asset Management Committee of such occurrence.
- The Municipal Manager must report criminal activities to the South African Police Service.
- If any biological asset is lost, stolen or destroyed, the matter shall be reported in writing by the Strategic Executive Director concerned in exactly the same manner as though the asset were an ordinary asset.

13. Asset Financial Control

13.1 Funding Sources

General

The Municipal Finance Management Act (MFMA) provides guidelines on how to utilise funds in financing assets (Section 19 of MFMA). The municipality shall utilise any of the following sources to acquire and / or purchase assets:

- Grants;
- Donations;
- Internally Generated Funds;
- External Loans; and / or
- Leases.

(a) The following formula shall be used to calculate preference points in respect of bids with a Rand value above of R50 000 000 (all applicable taxes included):

Where

P_s = Points scored for price of tender under consideration.

P_t = Price of tender under consideration.

P_{\min} = Price of lowest acceptable tender.

(b) Subject to sub-paragraph 70.3(c) points shall be awarded to a bidder attaining the B-BBEE status level contributor in accordance with the table below.

2	9
3	6
4	5

6	3
7	2
8	1
Non-compliant contributor	0

(c) A maximum 10 points shall be allocated in accordance with sub-paragraph 70.3(b) of this SCM policy.

(d) The points scored by the bidder in respect of B-BBEE contribution contemplated in sub-paragraph 70.3(b) shall be added to the points scored for price as calculated in sub-paragraph 70.3(a) of this SCM policy.

If the price offered by a tenderer scoring the highest points is not market related, the organ of state may not award the contract to that tenderer.

Where –

Ps = Points scored for comparative price of bid / offer under consideration

Pt = Comparative price of bid / offer under consideration

Ph = Comparative price of highest acceptable bid / offer

- (b) A maximum of 10 or 20 points, as the case may be, may be awarded to a bidder for B-BBEE status level of contribution.
