	THAT I C			
	HALLS			
	General The tariffs of charges set out under the various categories below shall include all the facilities in			
	connection therewith and shall be payable in advance. No reservation will be made or date for any hall will be reserved unless the amount for the hired accommodation together with the refundable deposit, has			
	been paid in full. The full rental amount, excluding the deposit, will be forfeited to Council when the hirer cancels or			
	postpones a reservation, unless Council is notified in writing at least 30 days prior to the reserved date about the cancellation			
	Any hall referred to below and all facilities and services concerned shall, at the discretion of Council, be			
	made available free of charge for civic mayoral functions, functions and meetings held by Council, municipal elections and functions specially approved by Council.			
	A hirer shall re-arrange and clean the premises and exterior surrounding of the under mentioned halls and/or facilities within the time permitted by the Caretaker, failing which he/she shall forfeit the deposit paid. The Director: Culture and Amenities may, if required, increase the minimum deposit.			
	Should the hall or facility been booked by a hirer, and the facility is required for use by Council, the hirer			
	will be requested to use an alternative hall or facility available from Council. Halls shall not be used as overnight accommodation and will be available daily from 08h00 to 24h00.			
	Penalty fees of R500,00 per hour or part thereof shall be levied in instances where the halls are not			
	vacated by 24h00. (Shows and exhibitions with a duration of more than one day exempted.)

K	FORT AMIEL MUSEUM General			
	The tariffs of charges shall be payable in advance. No reservation will be made or date will be reserved			
	unless the amount for the hired accommodation together with the refundable deposit, has been paid in full.			
	The full rental amount, excluding the deposit, will be forfeited to Council when the hirer cancels or			
	postpones a reservation, unless Council is notified in writing at least 30 days prior to the reserved date about the cancellation			
	The facility, shall, at the discretion of Council, be made available free of charge for civic mayoral			
	functions, functions and meetings held by Council, and functions specially approved by Council.			
	Cultural functions and programs organised by or at the discretion of the Director: Culture and Amenities			
	shall be made available free of charge.			
	A hirer shall re-arrange and clean the premises and exterior surrounding of the facility within the time permitted by the official on duty, failing which he/she shall forfeit the deposit paid. The Director:			
	Culture and Amenities may, if required, increase the minimum deposit.			
	Should the facility been booked by a hirer, and the facility is required for use by Council, the hirer will be requested to use an alternative hall or facility available from Council.			
	Only the grounds, lapa and ablutions facilities may be hired. Tents, tables and chairs will be for hirer's			
	own cost. The facility shall not be used as overnight accommodation and will be available daily from 08h00 to			
	22h00. Penalty fees of R500,00 per hour or part thereof shall be levied in instances where the facility is			
	not vacated by 22h00. (Shows and exhibitions with a duration of more than one day exempted.)			
	The facility shall not be used for weddings, religious or political meetings.

(0)	Definitions: Account: Is a grouping of premises/points of delivery according to the same voltage or location.			
	(Active) Energy Charge: Is a charge for each unit of energy consumed typically charged for as c/kWh or R/MWh. For some tariffs the charge may be time and/or seasonally differentiated.			
	Administration Charge / Basic Charge: It is a contribution towards fixed costs such as meter reading,			
	billing, administration and maintenance input and is a fixed charge payable every month whether electricity is consumed or not.			
	Annual Utilised Capacity: Is the higher of the customer's NMD or maximum demand, measured in			
	kVA, registered during a rolling twelve month period. Billing: Is the process of producing and delivering a bill (an account or invoice) for payment by a			
	customer, calculated from the tariff schedule or as per agreement between the parties (e.g. special pricing			
	agreements), and for the majority of customers, the consumption measured and recorded by the metering			
	system. Billing Period: Is the period from one meter reading date (actual or estimated) to the following meter			
	reading date (actual or estimated).			
	Chargeable Demand: Is the highest average demand measured in kVA in a billing month during the chargeable time periods specified for each tariff.			
	Chargeable Time Periods: Are the time periods when demand registered will be charged for. The			
	chargeable time periods differ and are described with the respective tariff. Cost-reflective Tariffs: Are tariffs that distinguish between the unique cost components (or cost			
	drivers) for a specific customer or customer class and where the cost components recover the full			
	economic cost to supply electricity to that customer. Energy Demand Charge: Applicable to Scale 4 and 5 tariffs, is a R/kVA charge per premise which is			
	seasonally differentiated and is based on the chargeable demand registered during the month in order to			
	recover peak energy costs. Estimated Load: The total connected load of an installation reduced by the diversity Factors according			
	to SABS : 0142 : 1993.			
	High Voltage: A nominal voltage of 132 000 Volt (\pm 5%) between any of the three phase conductors (SABS 1019).			
	Key Customer: Is a customer identified by the Municipality that receives special services or			
	consumes/records more than four 500 kVA recordings on contiguous sites. Licensed Area of Supply: Is an area for which the National Electricity Regulator of South Africa			
	(NERSA) has issued a licence to the Municipality under the provisions of the Electricity Act, No. 41 of			
	1987, as amended, for supply of electricity in that area. Newcastle Municipality tariffs are only			
	applicable where the Municipality is licensed to supply. Load Factor: Is a ratio between the actual energy consumed and the energy that could have been			
	consumed had the demand remained at the maximum for a usage period.			
	Low Voltage : A nominal voltage of 400 Volt (\pm 10%) between any of the three phase conductors and 230 volt (\pm 10%) between any phase and the neutral conductor (SABS 1019)			
	Maximum Demand: Is the highest averaged demand measured in kVA or kW during any integrating			
	period (normally 30 minutes) within a designated billing period (during all time periods).			
	Maximum Demand Charge: Payable for each kilovolt-ampère (kVA) supplied by the Council to a			
	consumer during the demand integrating period of 30 (thirty) consecutive minutes in the month or such time periods in the month as may be applicable			
	Medium Voltage : A nominal voltage of 11 000 Volt (\pm 5%) between any of the three phase			
	conductors (SABS 1019) Monthly Utilised Capacity: Is the higher of the customer's NMD or maximum demand, measured in			
	kVA, registered during the billing month.			
	Network Charge: Is a charge payable per premise every month. The purpose of the network charge is to recover part of the fixed network costs (including capital operations, maintenance and refurbishment).			
	to recover part of the fixed network costs (including capital, operations, maintenance and refurbishment) associated with the provision of network capacity required and reserved by the customer. For some			
	tariffs the network charge is unbundled into a Network Demand Charge (NDC) and/or a Network Access			
	Charge (NAC). Network Demand Charge: Is a charge that recovers network costs on a variable basis and is payable			
	for the chargeable demand registered during the month.			
	Network Access Charge: Is a charge that recovers network costs on a fixed basis and is based on the annual utilised capacity.			
	Notified Maximum Demand (NMD): Is the maximum demand notified in writing by the customer and			
	accepted by the Municipality, that the customer requires the Municipality to be in a position to supply on demand during all time periods. It is normally the capacity that the Municipality will reserve for a			
	customer for the short term, i.e. the following year. One calendar-month's notice must be given in			
	writing by the consumer to the Council of any increase or decrease in the notified maximum demand and			
	of the date upon which the revised supply is made available, the notified maximum demand shall be increased or decreased accordingly. <i>Note: The notification of demand is governed by a set of rules</i>			
	called the NMD rules.			
	Point of Supply: Means a physical point on the electrical network where electricity is supplied to the			
	customer or where the customer's network connects to that of the Municipality (also see premise).			
	customer of where the customer's network connects to that of the Municipality (also see premise).	·		
	Power Factor: Is the ratio of kW to kVA measured over the same integrating period. <i>Note:</i>			

	Actual 2016/2017 Tariff	2017/2018 Tariff	Actual 2018/2019 Tariff
Premise or Point of Delivery: Means either a single Point of Supply or a specific group of Points of			
Supply located within a single substation, at which electricity is supplied to the customer at the same declared voltage and tariff, and can be a metering or summation point.			
Rate Components: Are the different charges associated with a tariff that recover different costs, for			
example energy charge. Rate-rebalancing Levy: Is a separate rate component, shown on Scale 5, Time-of-Use tariff for			
customers' bills and indicating inter-tariff subsidies (subsidies between tariffs) in a more transparent			
manner. The rate-balancing levy is applied to the total active energy consumption and is not subject to the voltage and/or transmission surcharge.			
Reactive Energy Charge: Is a charge applicable if applied, to Time-of-Use tariff and is based on the reactive power used. It is levied on every kvar/h (reactive energy) which is registered in excess of 30%			
of the kWh (active energy) supplied during the specified periods of the month. There is no reactive			
energy charge for a customer operating with a lagging power factor of 0,96 or better. The method of calculating this excess differs and is described with the respective tariff.			
Single-phase Supply: A 50 Hz a.c. supply at 230 V r.m.s. phase-to-neutral. The neutral carries the full load current.			
Tariff: Is a combination of monthly charges each at particular rates that are usually escalated annually			
and are applied to recover measured quantities such as consumption and capacity costs and unmeasured quantities such as service costs.			
Three-phase Supply: A 50 Hz a.c. supply at 230 V r.m.s. phase to neutral; 400 V r.m.s. phase-to-phase (120° vector phase displacement).			
Time-of-Use (TOU) Tariff: Is a tariff that has different energy rates for different time periods and			
seasons in order to more accurately reflect the shape of the Municipality's long run marginal energy cost of supply at different times.			
Voltage Surcharge: Is a percentage surcharge levied to customers with lower supply voltages as a contribution to the cost to transform electricity from 11 kV to lower voltages. It is calculated as a			
percentage of the active energy charge, the energy demand charge (where applicable) and the network			
charge to reflect the higher cost at lower voltage. Conditions applicable to all tariff scales			
(a) A consumer may apply to the Council to be billed on either the standard or the Time-of-Use tariff. A consumer may not apply to change over from the standard to the Time-of-Use tariff or from the Time-of-			
Use to the standard tariff more than once in a period of 12 months			
(b) A consumer may apply to the Council to reduce or to increase the size of a circuit breaker (MCB) or the notified maximum demand. A consumer may not apply to reduce a circuit breaker or to reduce the			
notified maximum demand more than once in a period of 12 months			
(c) Definitions not covered by the Council's Bylaws will be the same as those recorded in the Eskom Tariff of Charges.			
(d) All infra structure up to the point of supply remains the property of the Newcastle Municipality and shall be handed over in accordance with the Electricity Department's standards. Maintenance of these assets			
and replacement will therefore be for the Newcastle Municipality's account.			
Scale 1: 20A domestic supplies (a) This scale shall also apply to indigents with a maximum estimated load of 20A single phase

	INDUSTRIAL EFFLUENT BYLAWS			
1.	The monthly charge payable by the owner or occupier of any trade premises in respect of any industrial effluent discharged into the Council's sewers, shall be assessed by uThukela Water at half yearly intervals and be notified to such owner or occupier not later than the 31st day of December and the 30th day of June in each year in accordance with the formula prescribed in paragraph (3) hereof, on the basis of the average result of not less than six analyses of the strength and quality of such effluent carried out at any time by uThukela Water during the preceding six months, which analyses may be at the discretion of uThukela Water be based on individual snap samples or on composite samples collected in a manner and under conditions approved by them from time to time, provided that each time a sample for analyses is taken one half thereof shall on his request be made available to the owner or occupier of the premises.			
	The charge thus assessed shall be payable in respect of the volume of industrial effluent recorded or determined as having been discharged each month during the preceding six months with effect from the first reading of the industrial effluent or water meter as the case may be for the month of January or July in each year.			
2.	In the case of trade premises from which industrial effluent is discharged into the Council's sewers for the first time, a charge shall be payable in respect of the interim period between the date of the first discharge and the 31st December or 30th June as the case may be. Such charge shall be assessed in accordance with the formula prescribed in paragraph (3) hereof on the basis of the average result of not less than six analyses carried out by uThukela Water from the date of first discharge and shall be paid in respect of the volume of industrial effluent discharged each month during the said interim period.			
3.	The charge payable in terms of paragraph (1) and (2) hereof shall be assessed in accordance with the following formula: 30.8 + (OA - 50) cents per kilolitre			
	(OA = mg2/1 4hr KMn04) Where OA is the oxygen absorbed, expressed in milligrams per litre, from acidic N/8 potassium permanganate in 4 hours: and where the OA is determined by uThukela Water on the well shaken sample in accordance with the method of chemical analysis given in Schedule D of the Council's Industrial Effluent Bylaws, or as he may deem proper, having regard to the nature of the industrial effluent to be analysed, details of such methods and the results obtained to be kept available for a period of 12 months for inspection by the owner or occupier of the premises from which the effluent emanated.			
	In the absence of any direct measurements, the volume or quantity of trade effluent discharged into the sewer each month from any trade premises shall be estimated and determined by uThukela Water from the monthly quantity of water consumed on the premises concerned, whether obtained from the Council or from other sources, due allowance being made for water used for domestic purposes, water lost by reaction or evaporation during the process of manufacture and water present in the final products manufactured.			
	All the abovementioned tariffs in respect of services rendered are subject to value added tax as determined from time to time
