	Licensed Area of Supply: Is an area for which the National Electricity Regulator of South Africa (NERSA) has issued a licence to the Municipality under the provisions of the Electricity Act, No. 41 of 1987, as amended, for supply of electricity in that area. Newcastle Municipality tariffs are only applicable where the Municipality is licensed to supply.			
	Load Factor: Is a ratio between the actual energy consumed and the energy that could have been consumed had the demand remained at the maximum for a usage period.			
	Low Voltage : A nominal voltage of 400 Volt ($\pm 10\%$) between any of the three phase conductors and 230 volt ($\pm 10\%$) between any phase and the neutral conductor (SABS 1019)			
	Maximum Demand: Is the highest averaged demand measured in kVA or kW during any integrating period (normally 30 minutes) within a designated billing period (during all time periods).			
	Maximum Demand Charge: Payable for each kilovolt-ampère (kVA) supplied by the Council to a consumer during the demand integrating period of 30 (thirty) consecutive minutes in the month or such time periods in the month as may be applicable			
	Medium Voltage : A nominal voltage of 11 000 Volt ($\pm 5\%$) between any of the three phase conductors (SABS 1019)			
	Monthly Utilised Capacity: Is the higher of the customer's NMD or maximum demand, measured in kVA, registered during the billing month.			

		Final Tariff 2022/23		Final Tariff 2023/24
	Network Charge: Is a charge payable per premise every month. The purpose of the network charge is to recover part of the fixed network costs (including capital, operations, maintenance and refurbishment) associated with the provision of network capacity required and reserved by the customer. For some tariffs the network charge is unbundled into a Network Demand Charge (NDC) and/or a Network Access Charge (NAC).			
	Network Demand Charge: Is a charge that recovers network costs on a variable basis and is payable for the chargeable demand registered during the month.			
	Network Access Charge: Is a charge that recovers network costs on a fixed basis and is based on the annual utilised capacity.			
	Notified Maximum Demand (NMD): Is the maximum demand notified in writing by the customer and accepted by the Municipality, that the customer requires the Municipality to be in a position to supply on demand during all time periods. It is normally the capacity that the Municipality will reserve for a customer for the short term, i.e. the following year. One calendar-month's notice must be given in writing by the consumer to the Council of any increase or decrease in the notified maximum demand and of the date upon which the revised supply is made available, the notified maximum demand shall be increased or decreased accordingly. <i>Note: The notification of demand is governed by a set of rules called the NMD rules.</i>			
	Point of Supply: Means a physical point on the electrical network where electricity is supplied to the customer or where the customer's network connects to that of the Municipality (also see <u>premise</u>).			
	Power Factor: Is the ratio of kW to kVA measured over the same integrating period. <i>Note: Contractually a customer may not have a leading power factor or a power factor below 0,85.</i>			
	Premise or Point of Delivery: Means either a single Point of Supply or a specific group of Points of Supply located within a single substation, at which electricity is supplied to the customer at the same declared voltage and tariff, and can be a metering or <u>summation point</u> .			
	Rate Components: Are the different charges associated with a tariff that recover different costs, for example energy charge.			
	Rate-rebalancing Levy: Is a separate rate component, shown on Scale 5, Time-of-Use tariff for customers' bills and indicating inter-tariff subsidies (subsidies between tariffs) in a more transparent manner. The rate-balancing levy is applied to the total active energy consumption and is not subject to the voltage and/or <u>transmission surcharge</u> .			

		Final Tariff 2022/23		Final Tariff 2023/24
	Reactive Energy Charge: Is a charge applicable if applied, to Time-of-Use tariff and is based on the reactive power used. It is levied on every kvar/h (reactive energy) which is registered in excess of 30% of the kWh (active energy) supplied during the specified periods of the month. There is no reactive energy charge for a customer operating with a lagging power factor of 0,96 or better. The method of calculating this excess differs and is described with the respective tariff.			
	Single-phase Supply: A 50 Hz a.c. supply at 230 V r.m.s. phase-to-neutral. The neutral carries the full load current.			
	Tariff: Is a combination of monthly charges each at particular rates that are usually escalated annually and are applied to recover measured quantities such as consumption and capacity costs and unmeasured quantities such as service costs.			
	Three-phase Supply: A 50 Hz a.c. supply at 230 V r.m.s. phase to neutral; 400 V r.m.s. phase-to-phase (120° vector phase displacement).			
	Time-of-Use (TOU) Tariff: Is a tariff that has different energy rates for different time periods and seasons in order to more accurately reflect the shape of the Municipality's long run marginal energy cost of supply at different times.			
	Voltage Surcharge: Is a percentage surcharge levied to customers with lower supply voltages as a contribution to the cost to transform electricity from 11 kV to lower voltages. It is calculated as a percentage of the active energy charge, the energy demand charge (where applicable) and the network charge to reflect the higher cost at lower voltage.			
2.	Conditions applicable to all tariff scales			
(a)	A consumer may apply to the Council to be billed on either the standard or the Time-of-Use tariff. A consumer may not apply to change over from the standard to the Time-of-Use tariff or from the Time-of-Use to the standard tariff more than once in a period of 12 months			
(b)	A consumer may apply to the Council to reduce or to increase the size of a circuit breaker (MCB) or the notified maximum demand. A consumer may not apply to reduce a circuit breaker or to reduce the notified maximum demand more than once in a period of 12 months
